

## Pensacola HVAC Company Shares Money Saving Tips

*October 29, 2018*

October 29, 2018 - PRESSADVANTAGE -

Pensacola, Fla. - Because of the hot and humid Florida weather in the summer, people tend to use their air conditioners more often. Because of the constant air conditioner use, electricity bills can increase significantly. Elite Mechanical Systems, a Pensacola HVAC company, has shared some tips to save people money on their next electricity bill.

Cleaning the air filters is one of the simplest and easy things that one can do to save money. Air filters need to be cleaned. Dirt and debris will get trapped in them causing the air to be dirty and not flow out properly. If done regularly, the house will stay cool and the Pensacola air conditioner will be letting air out properly.

Rob Simpson, an HVAC service manager for Elite Mechanical Systems, says, "If you take care of your air conditioning system, it will last you a long time and save money. Often people neglect to clean it or have any maintenance done and it ends up costing them in the long run."

Another simple way to save money on electricity bills is to check on the vents. It may seem obvious but be sure that the vents are open and the air is actually circulating throughout the house. It wastes money to have the air conditioner running. Also, clean the vents to ensure that the air that is being blown out is clean and free of any dirt or debris.
