

Junk Removal Company Expands In Jacksonville FL

November 09, 2018

November 09, 2018 - PRESSADVANTAGE -

Trashouts Junk Removal has announced that they are expanding into the Jacksonville, Florida area. The company is a family owned and operated junk removal company that was founded more than 16 years ago.

Mark Strickland, a representative for the company says, "We are pleased to be expanding our services to all areas of Jacksonville. We started out a few years ago by offering our residential and commercial customers the cleanout services that they need. Today, we are expanding our service area and look forward to meeting and service our new customers."

Strickland says that the company provides green junk removal in Jacksonville FL. He says that with every job, the company tries to donate or recycle no less than 60 percent of the items that they move. He states that they regularly recycle computers, appliances, tires, metal, and other items and that they donate many of these items to charities in their local community.

"We don't want anything to go to waste," says Strickland. "This is one reason that our customers have chosen to work with us year after year. We don't simply take your junk away and throw it into a landfill. We try to give it new life with someone else. We are very dedicated to preserving our environment."

Strickland says that customers merely have to call them and all of their junk will be effectively removed and the space cleaned. He says that a time and day is scheduled that works best for the customer and that often, depending on the circumstances, the company can pick up junk on the same day or on the next day. They offer a wide range of junk removal services including furniture removal, garage cleanouts, construction trash hauling, hoarding cleanouts, yard waste debris, appliance removal, office and homestead cleanouts and more. Those who are interested can learn more about junk removal on the company's official website at <https://trashoutsjunkremovers.com/>

Customers who are looking to get rid of unwanted clutter simply have to contact them for a quote and to set up a time for the removal, Strickland notes. He says that the company works throughout Clay, St. Johns and Duval Counties and are committed to providing the highest level of customer service possible.

Strickland says that the company hires only the most reliable and trustworthy staff for all of their removals. He says that the hard working crew will effectively remove all of the junk on the property and leave it looking spic and span. Trashouts Junk Removal is a full-service trash removal company and they state that their goal is to offer the highest quality of services with the best possible rates in northeastern Florida.

"We are always looking for new ways to make your life easier," says Strickland. "The expansion of our service area is just one more way that we go out of our way for you. Keep up with our latest happenings on our Facebook page and see for yourself what our other customers are saying or stay updated on what we have planned for you next."

Those who are interested simply call the company to schedule an appointment and they will contact the customer when they are half an hour away from the location. At the onsite appointment, the company provides an estimate for the clean out. Estimates are determined by the amount of junk that needs to be removed. Strickland says that once the job has been evaluated and a quote given for the removal that the customer approves, the company will effectively remove the junk from the property. He says that they have affordable costs for their junk removal as well as easy scheduling of removal services, and fast and reliable pick up services. The company disposes of all trash in an eco-friendly manner, which can include donating usable items to the community and recycling those that can be recycled.

Strickland says that the company is pleased to have expanded their services to now include new customers throughout the Jacksonville area. He says that while they do not have solid plans for expanding again in the near future, there is always a chance of a further service area expansion. As more and more customers learn about the quality of their trash and junk removal services, Strickland says that he will not be surprised if another expansion happens relatively quickly. He says that those who are interested in learning more can visit them on their official company website to get more information about the company in general as well as their service areas and the types of items that they will remove, as well as the types of customers that they

serve.
