Just Released: Gleam Naturals Coconut Oil Vitamins MCT Supplement

July 16, 2015

July 16, 2015 - PRESSADVANTAGE -

Health and beauty company Gleam Naturals LLC in Victorville, CA, have released their new coconut oil vitamins on Amazon. As can be seen on <http://www.vitacoconutoil.com>, these vitamins are beneficial for overall health, both inside and out. The Gleam Naturals LLC has a range of different benefits, but it addresses weight loss in particular.

"Our pure refined fractionated coconut oil is incredibly beneficial for overall health," says Remy Chikasu from Gleam Naturals LLC. "Scientific studies have been amazed by the various benefits this oil offers, with some suggesting it is a superfood, and others believe it to be a veritable wonder drug."

Studies have shown that the oils derived from coconuts is filled with various important vitamins. These vitamins help to build up the immune system, fighting both bacteria and viruses that can cause illness and disease. Similar studies have also shown that coconut oil helps to raise the metabolism, which is vital to help people achieve sustainable weight loss.

One of the reasons why Gleam Naturals LLC is focusing strongly on the weight loss properties of this oil is

that the oil not only increases metabolism, but that it suppresses appetite as well. It is believed that this is due to the way the fatty acids contained in coconut oil are metabolized by the liver. Additionally, it has been found that the oil helps to raise levels of HDL (the good cholesterol) and lower levels of LDL (bad cholesterol).

"We are focusing particularly on the weight loss benefits of coconut oil, but we want to stress that there are so many other benefits to it as well," adds Remy Chikasu. "It helps to improve the skin, hydrates hair to give it a beautiful shine, has fantastic antibacterial properties, is a great sunscreen and, finally, helps to improve oral health."

For Gleam Naturals, as shown on their website on <http://www.gleamnaturals.com>, coconut oil is both a superfood and a wonder drug. Their particular vitamins address all of its many benefits, leading to better overall health, inside and out. The fact that it also leads to weight loss is something that many consumers will find very attractive.
