

Sarnia Dental Office Offers Laser Cleaning Services

November 16, 2018

November 16, 2018 - PRESSADVANTAGE -

Edgewater Dental, a dental office in Sarnia, Ontario, Canada, has announced that their dentists have started to provide laser cleaning services in Sarnia. Recently, the dental office had announced that they have just added a Solea Dental Laser to their list of advanced dental equipment. Now, Edgewater Dental in Sarnia has begun to make use of the Solea Dental Laser for performing laser cleaning services.

An Edgewater Dental spokesperson says, "We would like people to know that our dentists are now using the Solea Dental Laser to perform laser cleaning services. We had previously announced with pride in a recent press release that we have acquired this kind of dental laser. And since laser cleaning is much more superior to the usual method of scraping away plaque and tartar with dental metal instruments, patients will be more comfortable as they undergo any procedure."

According to Edgewater Dental, the Solea Dental Laser is the first CO2 laser system that has been approved by the Food and Drug Administration (FDA) for use in hard and soft tissue dental procedures. The said dental laser was designed by Convergent Dental in Boston, Massachusetts, using the results of a study conducted at the University of California School of Dentistry. The frequency used by the Solea Dental Laser is unique and the laser is guided by advanced computers. This ensures that the cleaning procedure is practically painless.

The Edgewater Dental spokesperson asserts that laser cleaning is fast and effective so that patients spend less time in the dental office. There is less possibility of bleeding and inflammation when compared to the use of traditional dental instruments. Also, there is no drilling or scraping noise that can be irritating or even intimidating for the patient. Furthermore, the spokesperson assures people that the dental laser is completely safe and will not damage gums, teeth or other parts of the mouth.

The spokesperson adds that aside from dental cleaning and other general dentistry services, Edgewater Dental also provides cosmetic dentistry services. These include porcelain veneers, porcelain crowns, tooth recontouring, tooth whitening, and Invisalign teeth straightening. The Invisalign aligner trays are custom-fitted to each patient to ensure comfort. Because these are made from almost invisible plastic that the patient wears over their teeth, there are no embarrassing metal braces over the teeth. And because the aligner trays can easily be removed, unlike traditional braces that require the services of a dentist to have them removed, patients would be able to perform regular dental hygiene, such as brushing and flossing. Furthermore, because food bits do not get stuck, unlike in the traditional metal braces, damage to teeth from bacteria feeding on stuck food is avoided.

Edgewater Dental is composed of a team of professional dentists that always make sure that they provide quality care to all of their patients. Each of them has compassion and empathy for patients. Thus, they always make sure that a patient will be as comfortable as possible as he or she undergoes a dental procedure such as cleaning. They provide different kinds of dental services, such as general dentistry, cosmetic dentistry, orthodontics, and laser dentistry.

The two main dentists at Edgewater Dental are Dr. Jessica Milne DDS and Dr. Tim Pringle DDS. After graduating from the University of Toronto with a dental degree, Dr. Jessica Milne returned to her hometown Sarnia and there she agreed to work at Edgewater Dental. She had developed a strong interest in dentistry when she had worked at the orthodontic office of her father. Like Dr. Milne, Sarnia is also the hometown of Dr. Tim Pringle. He completed his undergraduate degree at the University of Western Ontario, and he studied Doctor of Dental Surgery at the Royal London Hospital dental school, where he also completed his dental surgical residency.

Meanwhile, the high quality of services provided at Edgewater Dental has been attested to by previous patients who have left positive reviews on the dental office's Google Maps page. For example, Wendy P. gave them five out of five stars and said, "The whole staff is so friendly and extremely accommodating to my personal dental preferences and needs. I definitely recommend Edgewater Dental to anyone!"

Don B. also gave Edgewater Dental five stars and said, "As a big chicken, going to the dentist has always been nerve-wracking - until my wife found this dental office. From the front desk personnel, the hygienist, to

the doctor, we've been treated wonderfully. I would recommend this office without reservation. I have my smile back!"

Jill L. also gave them a five-star rating and said, "Dr. Milne is the best dentist I have ever seen. They treat you so awesome and can sooo tell they care about your health! Thanks, ladies for being so kind."

Those who need more information about the laser cleaning services at Edgewater Dental can visit their website or their press page.
