

MyDealsClub Announces new Verizon Fios Deals

November 14, 2018

November 14, 2018 - PRESSADVANTAGE -

MyDealsClub is a Huntington Park, California based company that provides coupons and deal codes to customers. The company recently announced that they have new Verizon Fios deals available on their website.

Jake Durran, a representative for the company says, "We have a wide range of internet only specials and deals each month. We offer these to you as they are released by the companies that offer them and we have a number of reviews that you can read from other MyDealsClub members, as well."

A recent announcement informed consumers that they could receive a free year of Amazon Prime after signing up with Fios. Fios offers fast internet speeds and the Verizon recently announced that those who sign up for the Fios Gigabit Connection service that they offer will receive an entire year of Amazon Prime. Those who bundle their phone and television and opt in for a two year contract will receive a second generation Amazon Echo from the company as a "thank you" for signing up.

"Verizon is offering some really great deals," says Durran. "If you have ever thought about signing up with Fios, now is definitely the time. Not only do you get some great freebies from the company, we can help you to save money on the sign up and your future service."

Durran says that the Fios Amazon Prime offer includes television show and movie streaming, free games and access to free shipping through Amazon on a number of different items. Fios is a 100 percent fiber optic network, which means that it is faster and more reliable than cabled internet connections. Durran says that many companies are going to fiber optics for their network services and that customers are loving the service that they are getting. He says that those who are interested in what other customers think of the service can read through a few Verizon Fios reviews at mydealsclub.com/verizon-fios-review/.

PC Mag recently rated Verizon Fios as the fastest internet in the nation, comparing it with all other major suppliers. Fios has also earned the J.D. Power highest rank possible in customer satisfaction in the East for the sixth year in a row. Durran says that the company has no doubt that customers will love the fast speeds and reliability that Verizon Fios offers and he says that this is why the deal company has decided to include those deals and coupon codes on their website for consumers, just in time for the 2018 holiday shopping season. He says that fast internet will make an excellent gift for loved ones this holiday season.

MyDealsClub is a company that helps consumers by saving them money. The company adds discount codes to their website to allow consumers to purchase things online at a discount. Consumers visit the site and find the discount code that correlates to the product or service that they want and then enter that code at checkout. Durran says that they currently have coupon codes available from more than 3,000 popular online and offline stores, all from the United States. Consumers who want to start saving money simply have to visit the site and look through the various coupon codes that they are currently offering, including a number for Verizon Fios services.

The company began in 2009, and they currently have coupon codes that work with TurboTax, Amazon, Sears, Tire Rack, Hotels.com, Verizon and a host of others. Durran says that consumers simply browse the site to learn more about the coupon codes that they offer and to learn more about the company in general. They also have a number of social media accounts including Twitter and Facebook pages where consumers can stay updated with the latest information from the deals club and learn more about what coupon codes they have or what codes they may be adding in the near future.

Durran says that they have a wide range of coupon codes currently available that would be perfect for holiday shopping and says that these codes offer steep discounts over normal prices. Durran says that anyone who would like to learn more about their past deals, reviews and other news can visit their media room and those who would like to begin saving on things that they buy every day or things that they need for the upcoming holiday season can visit them and brows through their coupons. Durran did not say how long the new Verizon Fios coupon codes would last but simply urged those interested in visiting the site today while the codes are still valid.
