

Drug Rehab Orlando Center Provides Intensive Outpatient Services And Inpatient Residential Treatment

November 20, 2018

November 20, 2018 -

WhiteSands Treatment Center - Orlando has announced that they provide both intensive outpatient treatment and inpatient residential treatment for those with addiction problems. They point out that the WhiteSands drug rehab Orlando outpatient programs have been designed for treating drug or alcohol addiction. The outpatient programs provided are intensive and come in a variety of formats and levels of intensity to ensure that the program used is suited for a particular individual.

Joe Ducey from WhiteSands Treatment Center says, "Our Orlando rehab outpatient programs provide highly successful alcohol and drug treatment sessions for those who prefer to keep their privacy or just finished an intensive rehab program and need to follow up. They adjust to your lifestyle and pace, allowing you to schedule your sessions at various times throughout the week."

The primary advantage of the intensive outpatient treatment programs offered at the WhiteSands Treatment Center in Orlando is that patients can continue to live a normal life. They can continue to look after their family and go to work while they receive the appropriate treatment and advice for their addiction.

That the treatment programs really work is attested to by patients. For example, Steward S. gave them five stars and said, "WhiteSand Treatment Center saved my life. I went there in mid-Jan of 2018 and I have not touched a drug since. The drug rehab center gave me a great foundation to start my own recovery program. Thank you so much."

Meanwhile, Charles W. also gave a five-star rating and said, "WhiteSand Treatment Center is the best drug rehab center. It has helped me a lot. Unfortunately, the counselor I had, left with no explanation and was replaced by some other counselor who was great as well."

Joe Ducey points out that they accept private insurance, such as Aetna, Cigna, Blue Cross Blue Shield, AmeriHealth, and UnitedHealthcare. They only accept out of network insurance plans at their drug rehab facilities in Florida. However, the admissions staff will work with patients in ensuring that the best care available will be provided.

The treatment programs provided by the WhiteSands substance abuse treatment center include inpatient drug and alcohol rehab, medically-assisted drug detox, alternative drug rehab programs, and intensive outpatient drug treatment.

For inpatient drug and alcohol rehab, patients undergo intensive treatment while staying at the state-of-the-art facility of WhiteSands for 30 to 60 days. And because patients may experience withdrawal upon entering a treatment center, a team of professionals will administer the proper medications and monitor the patients every hour and every day to make sure that they are comfortable and safe.

Joe Ducey explains that WhiteSands has inpatient treatment facilities in Fort Myers and Tampa. One facility is located in Plant City, Florida, which is only minutes away from metropolitan Tampa. Joe Ducey says, "Here, you can focus on your recovery and well-being, while enjoying an environment of total comfort. Our staff of highly experienced addiction professionals is dedicated to helping in the recovery of those suffering from the disease of addiction."

The WhiteSands treatment center for the Tampa Bay area is designed to provide patients with a feeling of calm, relaxation, and peacefulness. This allows the patient to feel safe and secure and to be open with staff and other people, which helps in the tailor-fitting of the treatment program for their specific needs. A team of addiction specialists assess the needs of the patients, starting with a comprehensive intake assessment and followed up by personalized counseling. The result is a custom tailored treatment plan designed to increase the patient's chances of having a successful recovery from drug or alcohol addiction.

Meanwhile, at the Fort Myers inpatient treatment facility, the same accommodating staff of addiction

specialists is ready to welcome patients. And since WhiteSands staff do not believe in a "one size fits all" treatment program, an intake interview is conducted for each patient, allowing the specialists to create a more personal connection with patients and put the patients in a treatment program that is best suited for them based on their individual needs.

At Fort Myers, the facility is made up of nine resort style houses. Each house has four bedrooms, a big living room with couches and a flat screen TV. Each house is provided with its own therapist office and a group meeting room. Each house also has a wide lanai porch to allow patients to enjoy outdoor relaxation and the sun. There are also two swimming pools, various gazebos, fountains, and streams. Three community buildings provide the dining hall, gym, spa, snack cafe, and medical offices.

Those who need more information about the addiction treatment programs offered by WhiteSands may want to visit their website or call them by phone.
