

Burlingame Tree Leaders

Tree Service Company Announces New Burlingame Location

November 21, 2018

November 21, 2018 - PRESSADVANTAGE -

Burlingame Tree Leaders has announced that they are now providing tree pruning and removal services in the Burlingame, California area. The company states that they are launching their tree services just in time for the winter season, when trees need to be pruned or trimmed to keep them healthy and safe.

Anna Knox, a representative for the company says, "Winter weather can bring a lot of rain and wind, which is hazardous to trees. Now is the time to have those trees on your property checked out. You want to be certain that you don't have any loose or dying branches that could fall and harm people or cause damage to your property."

Knox says that home or business owners living in the Burlingame area can learn more about the services that they are providing by visiting them online at <https://burlingametreeleaders.business.site>. She says that the website offers more general information about the company's services and gives tips and advice for home and business owners about keeping their trees healthy and safe on their property.

Knox continues that trimming or pruning trees, and particularly removing trees, is a job that is often best left

to professionals. She says that Burlingame Tree Leaders has the experience, knowledge and specialized tools needed to perform the job safely and effectively.

"You want those trees removed or trimmed but you want to also ensure that no one is injured in the process," says Knox. "Particularly if you don't have any experience in removing trees, this is a job that is better left to a professional with the knowledge and experience needed to get that tree out of your way without harming you, your home or your other property. We always ensure the safest removals."

Knox says that many homeowners have injured themselves and even dropped trees right into their homes because they do not have the experience or tools needed to safely remove them. She says that unless the homeowner is a logger or someone who regularly cuts down trees, it is best not to attempt to remove a tree oneself, particularly if that tree is in close proximity to the home or other structures.

Trees must be pruned regularly in order to keep them healthy and to ensure that they do not become a hazard. Knox says that regular maintenance of trees, particularly taller ones, is important in protecting one's family and home. She says that the experts at the tree service company can come to the home or business and offer an estimate of the cost of the tree removal or trimming. She says that the no obligation quote is the first step in maintaining those trees and keeping them healthy.

Knox says that the company is offering a number of tree related services in Burlingame. Those who are interested in learning more about them or where they offer services can visit them online at <https://goo.gl/maps/HBWMHBEhNhA2>. The company states that they can help with the safe removal of healthy, dead or unhealthy trees. Knox says that any home or business owner who knows that they have an unhealthy tree on their property should not hesitate to contact the company immediately. She says that dying trees are very unsafe as they can fall over or begin breaking at any given moment, making them a hazard to properties, structures, people and wildlife in the area.

Trees often pose a problem to homes and other structures if they are growing too close to the structure. The roots can impede building of a home or they can cause damage to an existing home's foundation. As the roots continue to grow, they can push against the home's foundation, causing it to crack or break. Knox says that any homeowner who feels that they have a tree that is growing too close to their home can contact the company and they will send out a technician to survey the situation. She says that if a tree is indeed pushing on a home's foundation, the company can safely remove it before it causes any further damage.

Home or business owners in the Burlingame area who would like to learn more about the tree pruning and removal services offered by the company can contact them directly or visit them online on their official company website. Knox says that the gives property owners more information not only on the tree service company but on their trees as well. Blog posts include those dedicated to properly caring for trees and

keeping them healthy as well as how to spot a problem and when to get help.
