

Alameda Tree Leaders

Tree Service Company Announces New Services In Alameda

November 21, 2018

November 21, 2018 - PRESSADVANTAGE -

Alameda Tree Leaders has announced that they are now offering services in and around Alameda, California and the Bay area near San Francisco. The company states that they provide high quality tree pruning or trimming and removal services for home and business properties and states that their services now extend to those living in and around Alameda.

A representative for the company says, "Winter is quickly approaching. Even here in California, the winter months can be hard on trees. Colder air, winds and rain can all wreak havoc on those limbs and branches. If you have a tree that is already a bit less than healthy, winter can really cause an issue. Now is the time to contact us and allow us to check out those trees and ensure that they are healthy and safe."

The company says that trees that are unhealthy can be dangerous as they tend to break, crack and fall when heavier winds or rain are evident. They state that their newly launched tree trimming services are perfect for trees with dead or dying branches. They will effectively trim back trees that are unhealthy or those that may be falling over power lines or roofs to keep them from doing further damage.

The company says that they offer information related to trees and how to maintain them on the Alameda Tree Leaders website. The company representative states that any home or business owner in the Alameda region who may feel that they have a problem tree can contact them for a no obligation cost estimate.

?We want your trees to be healthy and beautiful,? says the company spokesperson. ?We also want them to be safe for your property. A tree that has dead branches poses a risk of falling and when that branch falls, it could damage your property, your home or even you or a loved one. We want to keep that from happening. Just call us and we will send out a qualified and experienced technician to check out those trees and let you know which ones need to be trimmed or removed.?

The company says that they have years of experience in their field and that they hire only experienced and highly qualified technicians to do their tree services. They state that all of their employees are checked out thoroughly before being hired and that only those who are the most professional and the most experienced make the cut. The new company states that they have years of combined experience and that they look forward to helping home and business owners in the Alameda area to keep their trees thriving and healthy.

They urge those in the area to only trust the services of a professional tree company when having trees removed or trimmed. The company representative says that there are a number of cases every year where people are taken to hospital emergency rooms because they attempted to remove or trim a tree themselves. The company states that depending on the size of the tree and the location in proximity to other trees and structures, removing or even trimming branches from a tree can be a rather dangerous task. They state that the task is often best left to professionals who will have the knowledge and experience, as well as the professional tools, needed to do a thorough job. The company continues that not only can removing a tree or trimming branches oneself be dangerous to property and people, it can be dangerous for the tree as well. Not knowing how to properly prune a tree could cause damage to the tree that it may not recover from, which would eventually lead to the tree dying and needing to be removed completely.

The company says that anyone living or working in the Alameda area are welcome to contact them to schedule their no obligation tree cutting or removal estimate. They state that they will send out a professional technician with experience in tree health and safety to survey the situation and provide a quote for the services that are needed. The company says that their website offers much more information on the services that the company will be providing in the area as well as general information on trees and their health. Those who are interested in learning more can visit the company online at <https://goo.gl/maps/MBEKJVz2HHA2> to view the tips and articles that they have published on their website. Alternatively, home and business owners in Alameda and the surrounding areas who would like to schedule an onsite estimate for their needed services can contact the company directly.
