

Electrical Contractor In Lynnwood Launches New Website

November 27, 2018

November 27, 2018 - PRESSADVANTAGE -

Lynnwood Electrical Services has announced that they have recently launched a new website. They are an electrical company that specializes in commercial and residential electrical services for people in Lynnwood and surrounding areas. The new website can be viewed at <https://lynnwood-electrical-services.business.site>.

Amy Millsy from Lynnwood Electrical Services says, "Lynnwood Electrical Services is a locally owned electrical contractor that has been helping Lynnwood business owners and commercial businesses for years with all their electrical. We are the local electrician near you that offer competitive and affordable pricing and guarantee all our work. We are a highly recommended electrical company and have many happy clients. And we are happy to announce that our new website is now operational as this means more people would be able to know about our services."

Amy points out that electrical problems in the home or business can become a major problem so it is imperative for homeowners and businesspeople who have electrical problems to contact a professional licensed electrician. For instance, if some fixtures and appliances are not working, there is a reason for that and the problem could become worse over time. Also, for those who need to replace or reset their circuit

breakers, is advisable for them to request for the services of a professional electrician. This could be a sign that there is something wrong with the electrical circuits and should be investigated or the problem could worsen and become a major issue. Those who need to find the location of Lynnwood Electrical Services can find them on Google Maps at <https://goo.gl/maps/82ByBkbDM8x>.

For homes with areas that are cold, Amy suggests the installation of electric baseboard heating by a licensed electrician. Meanwhile, smoke detectors are essential for the safety of homes and other buildings. The smoke detector is a must have whether it is battery operated or hardwired to the home's electrical system. Hardwiring may be better because homeowners will never have to worry about replacing the batteries in order to have the security of being warned in case of a fire.

Also, hot tubs and spas are essential for relaxation and enhancing overall health. However, they will need special wiring and breakers to avoid electrocution accidents. Thus, these will also require the services of a licensed electrician. Furthermore, a professional electrician will be needed for the installation of energy efficient track and accent lighting for those who want to have eco-friendly lighting.

Ceiling fans provide a way to enhance energy efficiency in the home. They cause the air to circulate, which moves the heat and air throughout the home. This makes it less costly to warm the home during winter or keep it cool during the summer months. And for homeowners who are planning to make some renovations to the home, experienced electricians will be needed to make adjustments to the electrical circuits.

And perhaps most important of all is the 24 hour emergency service provided by Lynnwood Electrical Services. The company's trained electrical contractors are available 24 hours a day and seven days a week, ready to serve the emergency electrical needs of homes and commercial establishments in Lynnwood and surrounding areas.

Amy explains that people can get assistance from Lynnwood Electrical Services on a number of things. These include smoke detectors; baseboard heating; ceiling fan installation and maintenance; hot tubs and spa wiring; outlets, receptacles and circuits; breakers and fuses; service panel upgrades; track and accent lighting; dedicated computer circuits; renovations; troubleshooting; telephone and data lines; security and landscape lighting; lighting design and maintenance; surge protectors; electric water heaters; exhaust fans; appliance circuits; ground fault interrupt circuit; and standby generator installations.

Amy says, "Don't hesitate to contact us if you have any electrical problem. Our business hours are 8:00 am to 5:00 pm, from Mondays to Fridays, and 9:00 am to 3:00 pm on Saturdays."

Amy points out that Lynnwood Electrical Services is the one that people in Lynnwood and surrounding areas should call first because of a number of reasons. This is because they are easy to reach and real people

answer the phone, instead of just machines. Also, they have highly trained and courteous electricians who have the necessary skills and experience, having performed thousands of repairs and solved electrical problems each year. They are also transparent about pricing, which means that customers get to know the price even before the work is started so that there would be no surprises. They also provide 24-hour emergency service, personalized scheduling, and fast response time.

Those who need more information about the services provided by Lynnwood Electrical Services can visit their new website, where people can also take a look at projects they have completed like the one featured at <http://bit.ly/2KAZJAI>.
