Boston Enterprises, a small independent business in Laomi, IL, has recently launched its newest product exclusively through Amazon. The new knife and scissor sharpener is another in a long list of consumer products that the company has offered since entering the Amazon marketplace in January, 2015.

Originally founded in 1981, Boston Enterprises strives to always be improving. Entrepreneur and CEO Allen Boston said, "We want to make your life a little easier with high quality products. Our goal is happy and satisfied customers. Your feedback is appreciated and will help us to improve."

Their newest product is a knife and scissor sharpener that is ergonomically designed for comfort and effectiveness. It features a ceramic rod for sharpening serrated knife blades and honing straight edge blades. It also has sharpening abilities for scissors, shears, pocket knives, and other tools.

It allows consumers to quickly and easily sharpen their tools to avoid injury and save time. The sharpening tool is specially designed to quickly sharpen tools, with just a few swipes, and the handles are designed for a sturdy and comfortable grip, helping to eliminate the risk of cutting or dropping the knife while sharpening. It is

designed to be safely used by both right and left handed consumers.

One Amazon purchaser had this to say: "Everything I expected. Sharpens very well. I also like there are a couple of ways to do the job. You're not limited to what you can do with this." Linda, a homemaker says, "Great little tool I finally have sharp knives in my silverware drawer." "Dull knives are more dangerous than sharp knives, and we wanted to provide our customers with a highly effective and easy way to keep those knives and scissors sharp," states Boston.
