

Smile Design Dentistry Announces That it is Now an Award Winning Plymouth MN Dental Practice

December 13, 2018

December 13, 2018 - PRESSADVANTAGE -

Smile Design Dentistry is pleased to announce that it continues to be an award-winning dental practice located in Plymouth, Minnesota. It is now a dental clinic with several major awards recognizing efficiency, accuracy, and patient satisfaction.

The practice itself has been voted as Minnesota's Best Dentist in 2017 by Minnesota Monthly and was also the winner of Best Dental Practice in Plymouth, MN by the Plymouth Magazine in 2018. Additionally, Dr. Brett Moore, DDS, was voted as the Minneapolis/St. Paul Magazine's Top Dentist. These awards alone speak to the collective experiences of the practice's skilled staff.

Dr. Jensen says, "I have been a dentist for over 30 years now. I was taught very early on that there are many important aspects to being a good dentist. My mentor taught me to prioritize doing a good job and to provide an exceptional experience. We help people overcome anxiety when they think about dental appointments. My goal, on the very first visit, is to relieve them of that angst. The results have spoken for themselves."

Dr. Corey Jensen, DDS, MAGD, started this private practice in 1987 after accumulating over 2,100 hours of

continuing education courses. He received the Distinguished Fellowship Award at the Academy of General Dentistry in 1994. This award recognized his many academic achievements over the years. Then in 2013, he was named as the Hall of Fame Dentist by the Minneapolis/St. Paul Magazine. Today, he strives to provide the best service and experience to his patients from all around the Plymouth, MN area.

The Smile Design Dental practices growth and peer recognition is a testimony itself of the success of this practice. They have managed to gain and retain many new patients and so expanded the practice by hiring additional dentists. Such dentists include Brett Moore, DDS, and Ali Mohebbi, DDS, DICOI. Each of these dentists brings incredible expertise and excellence in dental patient services at Smile Design's Plymouth, MN Dental Clinic.

Patients are glad to speak up. Edward Bourgeois was happy to speak about his patient experience at Smile Design Dentistry, "I have been with Smile Design Dentistry most of my adult life. One of the unique things about Smile Design that keeps me coming back is the quality of care I receive from the support staff. The staff turnover is almost zero which indicates to me that this is truly a care team. The staff, from the front desk to the back chair are people that seem to want to be here and who know me. The reason I keep coming back is the true satisfaction I feel in the care I receive. They are more than pushing product. They seem to actually care about the quality of their profession. In this day and age that is a refreshing experience. I highly recommend Smile Design."

Anglea Turner was glad to share this glowing review about her patient experience with Smile Design Dentistry, "You are always greeted with a "smile" at Smile Design Dentistry, from the moment you walk in the door you know you will be taken care of. My hygienist, Kerry was fantastic " if you don't "love" going to the dentist I would suggest requesting her. She was gentle yet very efficient. I walked out feeling fresh but not sore. It doesn't get better than Dr. Jensen, he gets down to business but always takes time to ask about your life! I know that I am receiving the best dental care when Dr. Jensen does my exam. I highly recommend Smile Design Dentistry for anyone looking for a great place to bring your family."

Smile Design Dentistry offers many different dental services that align with current trends in cosmetic dental technology. Some of the general family dental care services that are offered include cosmetic dentistry, dental restorations, crowns, bridges, implants, root canals, and of course, comprehensive dental care. Comprehensive dental care includes general oral maintenance such as cleanings, fillings, x-rays, and regular dental exams.

Types of cosmetic care include porcelain veneers, Invisalign, braces, tooth whitening, and wisdom teeth extractions. As the name of the clinic suggests, they offer Smile Design - which is a consultative approach to the best smile possible.

Smile Design Dentistry provides more advanced procedures as well. While some procedures are simple, such as whitening, veneers, or alignment; the company offers more advanced procedures like jaw surgery, full mouth reconstruction, gum reshaping, and periodontal treatment.
