

NutriCommit Announces the Launch of Their Probiotics for Women

December 18, 2018

December 18, 2018 - PRESSADVANTAGE -

Misra of NutriCommit is happy to announce the launch of their latest product 30 Billion Probiotics. 30 Billion Probiotics is a probiotic supplement, designed for women and men, that supports digestive health. 30 Billion Probiotics aids the gut in the absorption of nutrients, vitamins, and minerals which promote a healthy metabolism, healthy digestive health, and a healthy immune system.

NutriCommit is a company that produces and promotes supplements for improved health. They are a family-owned and operated business that focuses on providing high-quality supplement options for the health conscious.

When asked about this announcement, Misra had this to say, "Probiotics are an essential supplement for any man, woman, or child. We wanted to create a probiotic that improves gut health while also providing as many other benefits as possible. With 30 Billion Probiotic, you are getting the maximum results possible from a probiotic. A healthy gut means good digestion, optimal immune system, and a peak metabolism. This is all we want to provide to families like ours."

30 Billion Probiotic has been clinically tested and has received hundreds of notes from happy customers. The probiotic is considered to be shelf stable, so it doesn't require refrigeration. Users boast relief of symptoms from leaky gut, gastritis, GERD, digestive issues, candida overgrowth, irritable bowel syndrome (IBS), constipation, and proctalgia fugax. Some direct benefits users have claimed also include having more energy, feeling less sluggish, relief from nausea and reduced bloating. Readers interested in learning more about 30 Billion Probiotic can visit here: <https://amzn.to/2z6bU3O>.

Pawel Podhajny ordered 30 Billion Probiotic on Amazon and left this review, "I have taken several different probiotic supplements over the past several years. While some of them did provide benefits there were still unanswered questions left behind. With this probiotic formula from NutriCommit I am assured that the probiotics will survive the stomach acids and actually make it to the desired part of my digestive tract. Most probiotics will not survive the stomach acids. The next huge benefit with this formula that it does not contain any GMO, soy, gluten, or other trash which other probiotics do not guarantee. The results are evident within the first few days. I have been taking only one to two capsules consistently every day for about 20 days now. I am extremely satisfied with this formula and I hope it will remain the same without any changes to it."

Many probiotics are prescribed to provide relief from heartburn or acid reflux, but over-the-counter probiotics can be used for a plethora of reasons. The gut is filled with billions of microscopic organisms that assist in the breaking down of food in order to extract nutrients. While they are actually called bacteria, they are good bacteria. As the number of good bacteria dwindles in a digestive system, a person's overall health can be affected. A reduced number of good bacteria can cause indigestion, low-functioning immune system, and a malabsorption of nutrients. Taking a daily probiotic, like 30 Billion Probiotic, aids in increasing the good bacteria and preventing these problems.

Another 30 Billion Probiotic User, Hilary, was glad to share her review of the product, "Basically out of the blue I decided to try these probiotics. I have Ulcerative Colitis so my digestive system is quite cranky with upset stomachs here and there. I take medicine everyday for the Colitis and have been on three different prescriptions. I began these probiotics about two weeks ago and I'm happy I got them. It has made my system a bit more normal feeling - actually quite a bit better. I wish my GI doctor recommended these to me sooner. My system feels a whole lot healthier. At least these pills are something natural and not like the unknown prescriptions I take. I think these will be good in addition to my other medicines. Lastly, the capsules are very small and have no aftertaste."

Probiotics are a great solution for both men and women who are interested in improving their gut health. With 30 Billion Probiotics, they are getting a highly-reviewed product. For those interested in learning more about NutriCommit can visit their website at nutricommit.com.

Misra of NutriCommit also wanted to share this comment about his company and 30 Billion Probiotic, "At

NutriCommit we are dedicated to not only finding or making the best products for families, but we also test them ourselves. We would never promote a product that we didn't think was worth the investment. 30 Billion Probiotic has been one of our favorite supplements to date thanks to its incredible number of benefits.?
