

Worley's Electrical Services Announces New Website for Electrician in Bellingham WA

December 12, 2018

December 12, 2018 - PRESSADVANTAGE -

Scott Worley of Worley's Electrical Services is happy to announce the launch of a new website for his electrical company located in Bellingham, WA. Worley's Electrical Services serves the electrical needs for the local community. With their experience, the electricians of Worley's know the intricacies of the industry.

When asked about this announcement, Scott Worley had this to share, "Though we've had a website in the past, it was simply outdated. It came to our attention that when residents would look us up on the web and see our website, they assumed we were no longer in business. It was time for a change. This new website will allow us to be more visible to the public and will give residents a modern way of contacting us."

In previous years, residents of Bellingham have been able to rely on Worley's Electrical Services whenever they needed electrical services. Whether for maintenance, repair, or installment, their electricians have been eager to provide service with expertise, knowledge, and a smile. Customers of Worley's have often recommended this company to their friends and family when in need.

While most think of an electrical company simply going to a home or office for repairs or major installations,

there are many reasons to call an electrician. As Theresa experienced, large appliances can damage a power system if not properly installed. Worley's Electrical Services urges residents and business owners to contact them before trying to install something themselves. An install done correctly the first time is much cheaper than an installation and a repair. They are located in the heart of Bellingham, here: <https://goo.gl/maps/M6hjiHQeJXo> and can be reached day or night by telephone or contact form on their website.

In addition to adding lights and installing hot tubs, Worley's can also help with baseboard heating, ceiling fan installation, electrical wiring for renovations, and even exhaust fans for commercial properties. Worley's also offers 24-hour emergency services, quick response times, and clear pricing. Worley's dedicates their business to being transparent and honest. To learn more about Worley's Electrical Services, visit their new website here: <https://worleys-electrical-services.business.site/>.

Tammy from Bellingham shared her experience with Worley's, sending them a letter directly, "Hi everyone, I just wanted to say thank you for the service you provided me and my family. With just 3 hours without power due to the surge, we realized that we need electricity in our lives. It felt like the dark ages in just 3 hours. Thank you for coming out on short notice and completing the repair quickly. As I said that night, I am going to recommend you to everyone I know. Thanks again - so much!?"

Those who need more information about the services provided by Worley's Electrical Services can visit their new website, where people can also take a look at projects they have completed like the one featured at <http://bit.ly/2C7fH2J>.
