

Assisted Living And Memory Care Now Available In Lake Charles

December 10, 2018

December 10, 2018 - PRESSADVANTAGE -

The Verandah Assisted Living and Memory Care has announced that Lake Charles, LA, residents who require memory care programs for Alzheimer's disease or dementia can now find the services they need at the award-winning independent and assisted living community. The Verandah at Graywood has just announced preleasing at their new memory care community that will be opening in February 2019.

Sarah Peters from The Verandah Assisted Living and Memory Care says, "The Verandah at Graywood's specialized memory care neighborhood ensures that residents who need broader services and a safer environment have everything they need without having to endure the stress of a move and acclimation to a new community."

The new facility at the Lake Charles assisted living neighborhood is a state-of-the-art memory care community that is designed to address the cognitive, social, spiritual, emotional, and physical needs of residents. Here, the residents are motivated to express themselves and offer feedback, learn and grow, and establish new relationships in a safe and encouraging environment. As such, the amenities and activities are designed to contribute to such goals. These amenities and activities that residents can access at The

Verandah at Graywood at their leisure include music therapy, aromatherapy, life skills stations, socialization opportunities and low-impact exercises.

The Verandah at Graywood knows the importance of reminiscence and therefore provides familiar and comforting smells and sounds for the residents like the smell of freshly baked pie and music from the time when the residents were still in their youth.

Of utmost importance is the personal care provided for the residents of the memory care neighborhood. The arrangements will be same as the routine established by the residents at home. For instance, whether they prefer to bathe or shower, what time they eat their meals, and how much assistance they require. Support staff will inquire into these personal preferences when residents move in. Some of the services that are available for them are bathing, dressing, grooming, oral care, health monitoring, and medication management.

Residents of the memory care neighborhood at The Verandah at Graywood will also have full access to the amenities available to the whole assisted living community, such as 24/7 gourmet dining, salon, movie theater, fitness center, art studio, tavern, fishing points, chapel, library, computer center, and barbecue center. The Verandah at Graywood also offers free transportation to and from off-campus local destinations for appointments, shopping, and other purposes.

Of important note among the services provided at The Verandah at Graywood is daily rhythm programming. A certified Life Enrichment Director is in charge of a research-backed health and wellness program that is integrated into the daily activities and weekly social on-site events and cultural excursions that are available to the residents. These include activities that develop social connections, provide spiritual support, allow emotional expression, and promote intellectual discovery.

Furthermore, residents are encouraged to spend some quality time outdoors. They can take a walk around the beautifully landscaped grounds, relax with their friends and family in the courtyards, and enjoy fishing in one of the fishing ponds.

It should also be noted that short-term and respite stays are also available for people who are going away for business, going on a vacation or simply want a break from caregiving. The Verandah at Graywood can offer the care that is needed by their senior loved ones while they are away. Their loved one can benefit from the full amenities available in the community and people can have peace of mind knowing that an emergency response system is always available for their elderly loved ones.

Sunshine Retirement Living is the company that manages The Verandah at Graywood. It is a family-owned and patient-centered company with almost two dozen retirement living communities throughout the United

States. They provide a complete range of services in their assisted living, independent living, and memory care communities. Their goal is to enhance the lives of seniors and their families by encouraging independence, self-confidence and relationships in the residents.
