

Roof Repair Company Expands Into Emergency Repair Services

December 06, 2018

December 06, 2018 - PRESSADVANTAGE -

Infinite Roofing and Construction, based in Colonie, NY, has announced that they are now expanding into emergency repair services for both commercial and residential roofing. Their expansion includes an entirely new service division that will focus on providing fast repair and maintenance for roofs. They explained that with their expansion, an annual maintenance plan with yearly or bi-yearly visits will be made available in the effort to prolong the life expectancy of roof tops in the Capital Region.

Anthony (Tony) Pazzaglia, who has been newly hired at Infinite Roofing and Construction, spearheads the new initiative. Tony brings with him 35 years of experience in the roofing industry, helping companies like Baker Roofing, Simon Roofing, and Tecta American Weatherguard expand their service departments and crews for repairing roofs. Tony has all the latest equipment including leading edge forward-looking infrared (FLIR) cameras for detecting the most difficult to find leaks.

Infinite Roofing and Construction owner John Musto has so much faith in the abilities of Tony that he said, "Tony's so good he can put his ears on the roof and hear where the water's coming through. The new team addition and the new, specialized crew will help better serve our customers directly. The Capital Region has

had so many storms the past few years that most roofing companies are overbooked or not looking to do repair work and many customers complained of how difficult it was to find a company who could help them with the repair work that needed done.?

They point out that the expansion into a dedicated repair crew comes right after Infinite Roofing had expanded into Saratoga with a new office, resulting in the dramatic expansion of their quick service area. The new roof repair service will be made available in both Saratoga and the Albany, Troy, and Schenectady regions.

Meanwhile, the high quality of their services has been attested to by past clients. For instance, Shannon H said, "John told us the work would be scheduled in approximately 3 weeks, we were okay with. A couple days later he called and said if it was okay with us he'd get it done [ahead of the original schedule time] that day. Done in one day with all trash removed and one of the best prices. Very pleased. Will definitely use again!"

Also, Dustin K said, "I am very happy that I choose John and Infinite Roofing. John was prompt and responsive with his estimate and kept me informed of his workload and when he could perform the work. John was professional, experienced and knowledgeable. I would recommend Infinite Roofing."

Tony says that there are many possible causes of roof damage in the Capital Region. The main ones are a shifting house; poor construction of the roof; additions to the roof such as antennas, satellite dishes and solar paneling; and the harsh weather, such as strong winds, heavy rains, ice storms, and hail.

Infinite Roofing and Construction offers services for residential and commercial buildings for shingle roofing, metal roofing, EPDM roofing, flat roof work, full roof replacement or repair, skylight installation, and solar installation.

Aside from roofing, they also offer services for sidings. This can either be fiber cement siding or vinyl siding. Fiber cement siding is preferred over vinyl because it offers a more authentic wood grain look and it provides stronger climate resistance against rough winters. On the other hand, vinyl siding is less expensive.

Infinite Roofing and Construction has 20 years of experience in providing residential and commercial roofing repair in the Capital Region. They have a 5-Star rating on Google, A+ Accredited with the BBB, and a Top Pro badge from Thumbtack. Furthermore, they are a GAF Certified Weather Stopper Roofing Contractor, certified for IKO Shield as a Roofing Contractor, a 5 Star contractor with Certainteed, and one of the few James Hardie Preferred Contractors in the Capital Region.

Those who need more information about the services offered by Infinite Roofing and Construction can visit their website or contact them by phone.
