

Wellness Clinic in Toronto Offers IV Vitamin Therapies to Boost Health

December 14, 2018

December 14, 2018 -

Dr. Amauri Caversan, a Toronto Naturopathic Doctor, offers various IV vitamin therapies in his wellness clinic that can help boost the immune system and overall health.

IV vitamin therapies may be used to help treat and prevent illnesses such as allergies, chronic fatigue syndrome, migraines, digestive disorders such as irritable bowel syndrome, celiac disease, Crohn?s, Ulcerative colitis and many other illnesses. Dr, Amauri says ?Proper vitamin intake is needed in order for the body to function at its highest. During IV therapy, essential nutrients are delivered directly to where they are needed helping the body recover quicker.? IV vitamin therapy can help with feeling better quicker especially when merged with a healthy diet and fitness program, he states. This happens because it delivers a safe dose of vitamins, amino acids and minerals directly into the vascular system. ?You can check some of these IV vitamin therapies you may need in our blog,? Dr. Amauri states.

Glutathione IV drip, a popular IV treatment, helps support energy, immunity, and skin. This would be a good

treatment for people with stressful, hectic lives who constantly feel fatigued, become sick easily, and have issues with skin such as dryness, eczema, or psoriasis.

NAD IV therapy is a new therapy for addiction. According to Emerald Neuro-Recover Centers, Harvard Medicine states that ?NAD IV Therapy is proven to have an 87% success rate?. Unlike other IV therapies that take on average 60 to 90 minutes, the addiction therapy takes several days of IV treatment.

Other therapies available are super virus fighter: a cocktail of high levels of vitamin c, lysine,k and zinc, and there are vitamin IV's for eye support, liver function, headache and mood support. Another IV Vitamin therapy available at the clinic is Cancer Support High Vitamin C which helps patients with cancer fight it off better, reduce the side effects of chemotherapy and radiation.

Beside the IV vitamin therapies, Dr. Amauri offers other wellness services that include pain management, testosterone replacement therapy, fertility, thyroid support, Bio-identical Hormone Replacement Therapy, and weight loss. The pain management therapy includes acupuncture, natural anti-inflammatories, and naturopathic manipulation. This could help relieve the crisis of drug overdoses from opioids.

Testosterone replacement therapy consists of Dr. Amauri Caversan, ND and partnering with Arv Buttar, NP, to offer a complete mix and practical medicine package for men who have low testosterone. It deals with a slow metabolism, fatigue, increases lean muscle mass, and helps with the sicknesses that low testosterone can lead to such as diabetes, erectile dysfunction, cardiovascular disease, and obesity. Low testosterone generally, hits men starting in their 40s and as they age will have even lower testosterone levels. Males should seek help when they first start noticing the issues of low testosterone, Dr. Amauri will start with running tests and a wellness program approach in order to restore testosterone levels to where they should be.

Bio-identical Hormone Replacement Therapy is the beneficial use of hormones that precisely have the same molecular construction and purpose as the hormones made naturally in the body. These ?physically identical? hormones can be extremely effective in the relief and treatment of the symptoms of hormonal imbalance or deficiency.

All naturopathic treatments are available at Dr. Amauri Wellness Centre by appointment. Dr. Amauri has a Bachelor of Science degree and graduated from the Canadian College of Naturopathic Medicine (CCNM), Canada?s top educator of naturopathic medicine. Along with his own thriving practice, Dr. Amauri is frequently asked to give seminars in integrative medicine where he discusses cleansing toxins, anti-aging, IV therapy, environmental medicine, and chronic disease prevention.

Those interested in more information can visit their IV therapy Toronto drip lounge for more information on

the type of intravenous treatment they may need.
