

Solar-Movement Offers To Pay \$500 If Customers Sign Up For Solar Panels

July 06, 2015

July 06, 2015 - PRESSADVANTAGE -

Solar-Movement, a renewable energy company in Las Vegas, NV, has just released a brand new special for their customers. Those who install solar panels in their properties using Solar-Movement will be offered to have their electric bill paid up to \$500. Solar-Movement hopes this will encourage a greater number of people to opt for solar energy.

"We are passionate about solar energy and saving the planet and believe those two things go hand in hand," says Xavier Ramirez from Solar-Movement. "We want to show people just how much money they can save on their energy bills by installing solar panels and, if they decide to do so, we will pay their electricity bill up to \$500 for them."

Solar energy is by far the cleanest form of energy in existence today. Furthermore, thanks to recent advances in technology, it is now even possible to install these panels on properties where daylight is quite minimal. While a degree of solar illumination will always be needed, anything is better than nothing, particularly when it comes to saving the planet.

"There is a huge ball of free energy floating right above us each and every day - our sun!" states Xavier Ramirez. "The energy is completely clean and will never run out so long as our star keeps burning. It doesn't damage the planet in any way and it helps to reduce energy bills as people become less reliant on fossil fuels. And to top it off, you can now get \$500 towards your energy bill as well! It doesn't get much better than that."

Solar-Movement is truly committed to improving the planet as a whole. This commitment and passion is made clear on the About Us page of their website, which also outlines the various services that they offer. Their goal is to make sure everyone has an opportunity to significantly reduce their carbon footprint and thereby do their part in terms of protecting the earth. By offering customers up to \$500 off their energy bills, Solar-Movement truly does go above and beyond the call of duty when it comes to protecting our planet.

"Every purchase of our Solar panels, we donate \$100 to the Wounded Warrior Project . As a former Marine, I want to help as many families as possible and I feel this is an important program to be a part of!" adds Xavier.
