

Tech Dogs
By: IT-Director, I.

I recently had the pleasure of working alongside one of Tech Dogs employees, Eric. He was very pleasant to talk to, real professional, and not too pushy. While walking on our initial onsite visit, he fixed quite a few issues with our printers. I can't begin to tell you how much time and effort I've saved because I use their services. Tech Dogs service has been excellent, above and beyond my expectations from any of my vendors.

Tech Dogs Reveal They Have Received Another Positive Review for Managed Print Services

May 28, 2019

May 28, 2019 - PRESSADVANTAGE -

Tech Dogs, a business based in Plano, TX, has announced that they have received another positive review for their managed print services. The company provides managed print services so that businesses won't have to worry about repairs and supplies for their laser printers. The new positive testimonial can be found at <https://techdogsonline.com>.

Joe Sison, Founder and President of Tech Dogs, says, "We are extremely glad to have received yet another five-star review from one of our clients. We have always focused on providing high quality solutions to our clients and we are happy that our efforts have been paying off."

In the customer testimonial, the IT director of Baylor Medical Center, says, "I recently have the pleasure of working alongside one of Tech Dogs employees, Eric. He was very pleasant to talk to, real professional, and not too pushy. While walking on our initial onsite visit, he fixed quite a few issues with our printers. I can't begin to tell you how much time and effort I've saved because I use their services. Tech Dogs service has

been excellent, above and beyond my expectations from any of my vendors.?

Rachel Roberts, Tech Dogs' Operations Manager says, "We work closely with clients to customize a bundled solution that offers a way to control printing costs without sacrificing quality or service. Using the latest technology, Tech Dogs provides real-time reporting and valuable data to help clients build a case and execute a plan to control cost and deliver optimum service back to their end-users.?"

Companies and IT departments who partner with Tech Dogs, according to Rachel Roberts, will enjoy a range of benefits through their Bundled Service Programs. These programs are customized to ensure they fit the dynamic business needs of the client. These programs are designed to address all the technical service requirements and streamline the supply needs of the organization. Those who want to pay a visit to Tech Dogs can find their location at 1200 Placid Ave., Ste 500, Plano, TX 75074.

With regards to the products, highly trained staff offer clients the right advice on equipment and printer consumable products with the result that clients are able to get more supplies with their limited budget. Clients are given the option of using OEM or remanufactured laser toner cartridges.

Tech Dogs also wants to point out that unmanaged printers often result into wasted consumable and devices, including wasted time and money when employees try to use the printer or repair it. Without the right controls and measures, the ink and toner cartridges for the laser printers will tend to run out long before they ought to and the printing costs tend to go beyond the budget. The managed print service offered by Tech Dogs is designed to avoid such waste. Tech Dogs will take care of the maintenance and repair so that the client's staff can focus on their work and they are assured to have fully functioning printers around the clock.

Rachel Roberts explains the various benefits that clients can enjoy. These include substantial savings compared to other providers that offer cost-per-page contracts; 100 percent performance guarantee for all printer repairs and all toner products; assurance that the products and equipment are all environmentally friendly; ability to choose from a wide array of more than 60,000 printer related products; and full compliance with the manufacturer's warranty.

Tech Dogs has more than 10 years of serving businesses by providing a professional team of account managers who work closely with clients to determine the best solution for minimizing total printing costs and streamlining the supplies and repairs for the client's laser printers. The company has developed the diverse capability to handle all of the laser printing needs of clients. They offer nationwide service with professional and dependable technicians on call and ready to troubleshoot any printing problems that the client may have, through online, phone, or in-person. The technical expertise of their staff covers laser printers of known brands, such as Lexmark, Hewlett Packard, Canon, Epson, Brother, and more.
