

Transmission Repair In Meridian Idaho For Cars And Trucks Now Available

December 11, 2018

December 11, 2018 -
Meridian Transmission Repair in Meridian, ID, has announced the availability of transmission repair services for cars and trucks in the metro area. The company points out that people in Meridian and nearby areas can avoid expensive repair bills in the future by having the transmission of their diesel-powered trucks serviced by professionals.

A Meridian Transmission Repair representative says, "Diagnostics is the most important process when evaluating your vehicle's transmission issues. Our services are convenient to other nearby locations, such as Ogden Utah, Las Vegas Nevada, Cheyenne Wyoming, Denver Colorado, Portland Oregon, and Seattle Washington."

The transmission repair services offered by Meridian Transmission Repair include those for transmissions; automatic and standard; transmission exchange; trans-axles constant velocity joints repairs; service for RVs, cars, trucks and 4x4s; foreign and domestic; differentials, 4x4 transfer cases; CV drive axle service; racing

transmission modifications; and clutch repairs.

They also provide services for: repair of axles; heavy towing application modifications; repair of transmission coolers; repair of boat transmissions; gearbox repair; constant velocity joints and boots replacement for all front wheel drive and all-wheel drive vehicles and 4x4s; overhauls and repairs; repairs for automatic and manual transmission; and factory and aftermarket transmission installation.

The Meridian Transmission Repair representative says that they service almost all vehicles. Some of the types of vehicles they have already serviced include: Cadillac, Ford, Subaru, Jeep, Honda, Hyundai, Buick, BMW, Chrysler, Acura, Jaguar, Mazda, Audi, Saturn, Dodge, Chevrolet, Toyota, Nissan, GMC, Allison, KIA or Motor Home RV, Mercedes Benz, Range Rover, and Volvo.

The Meridian Transmission Repair representative continues, "Transmission replacement labor cost depends on the age of your vehicle and how you plan on using your vehicle. New units are for sale and rebuild kits are available. Arm yourself with the right knowledge you?ll need to know to make an informed decision about where you decide is the right place to take your vehicle for service. We also offer complete automotive repair services."

At Meridian Transmission Repair, they believe that diagnostics is a critical component of the repair process because it is used to discover the cause of the problem. The Meridian Transmission Repair representative says, "At Meridian Transmission Repair we believe it is just as important when it comes to diagnosing issues you have with your vehicle's transmission. So if any transmission shop tells you they have to 'open' up your transmission to find out what the problem is... and have not taken your vehicle for a road test or electronically scanned your vehicle?s transmission... we recommend heading for the door - fast."

They also would like to remind people a used car or truck pre-purchase inspection is essential as this could save the buyer thousands of dollars. Meanwhile, a transmission rebuild may be able to add tens of thousands of miles to the vehicle, which means savings for the buyer.

Meridian Transmission Repair also notes that many transmission shops would recommend getting a new transmission without checking whether this is what is really needed. The representative says, "It's overkill. This is much like quoting a price on 4 brand-new tires to fix a flat tire. Or, getting a price on a new engine will fix a motor that needs a tune-up. Rest assured, we can fix just about any problem with any transmission."

Meanwhile, the company also offers racing transmission modifications. They point out that this is vital for racing drivers whether on the street or on the race track. The representative says, "We can eliminate all clutch problems without relying on expensive valve body/pump modifications."

Also, big horsepower will require big brakes to ensure that drivers can stop the car safely. Meridian Transmission Repair points out that they can also handle the necessary modifications. Their service areas include Ontario Oregon, Twin Falls Idaho, Pocatello Idaho, McCall Idaho, Las Vegas Nevada, Salt Lake City Utah, West Valley Utah, Orem Utah, Denver Colorado, Cheyenne Wyoming, and Coeur d'Alene Idaho.

Some of the jobs they have completed in racing transmission modifications are for a 200 mile per hour diesel truck racer at the Bonneville Salts flat; Dodge Ram transmission modifications for a 2000 horsepower drag racing truck; 13-inch Dodge Ram brakes; and 1000 horsepower Dodge Ram transmission upgrades for a drag truck.

Meridian Transmission Repair is locally owned and family operated for more than 30 years. They assure clients by providing a written warranty for every job. They also provide an electronic scan and road test free of charge.
