

White Sands Winter Park Treatment Center Announces Intensive Treatment Options

December 13, 2018

December 13, 2018 - PRESSADVANTAGE -

WhiteSands Treatment Center's Winter Park drug rehab facility has announced new intensive treatment options for drug and alcohol addiction. The treatment center has a number of addiction treatment facilities throughout Florida.

Joe Ducey, a representative for the facility says, "We have intensive inpatient and outpatient treatment options and can help patients to determine which of these is best for their recovery needs. We have a variety of treatment types and levels to ensure that each patient receives the specific treatment that will help them to reach the highest level of recovery success."

Ducey states that the Winter Park facility offers highly successful rehabilitation that is adjusted to the pace and lifestyle of each patient. Sessions for outpatient rehab can be scheduled at various times through the week to meet the specific needs of the patient.

Ducey continues that outpatient treatment can offer a number of benefits for those who cannot for one reason or another, spend weeks in a traditional rehabilitation setting. He states that the facility's intensive outpatient

treatment offers the same level of success as inpatient options and says that the main benefit is that outpatient treatment allows the patient to lead a normal life, spending time with family and going to work or school, while they are receiving treatment.

"We have had numerous patients to tell us that they are glad they came to us for treatment," says Ducey. "One patient, actually many of them, claim that we saved their lives by getting them off of drugs or alcohol and getting them on the right path to recovery. It's what we do and we strive to do it the best way possible."

Ducey says that each WhiteSands Treatment Center in Florida accepts private insurance, including Blue Cross Blue Shield, Aetna, Cigna, AmeriHealth and various others. He states that they only accept insurance plans that are out of network but states that the admission staff can work with patients to help them to determine the best care and how to work with insurance companies for billing.

WhiteSands offers treatments that include inpatient and outpatient drug and alcohol rehab, as well as medically assisted drug detox and various other treatment methods. Ducey says that all of their treatment methods have been proven effective and that their patients are a testament to this fact. He says that their facilities are designed to give patients a feeling of total relaxation and that all staff members work to ensure the complete comfort of their inpatient and outpatient patients.

Ducey states that the facility does not believe in a cookie cutter approach to drug and alcohol rehab. He says that there is no one solution that will work for every addict but states that WhiteSands believes that each patient deserves a one-on-one approach to their recovery. He says that quite simply, what works well for one patient may not work at all for another, which is why the facility focuses on the individual and not the drug of choice in all of their treatment efforts.

WhiteSands Treatment Centers has locations throughout Florida including in Fort Myers, Tampa and Winter Park. Their Fort Myers facility offers inpatient treatment in a resort-style setting that is designed to help patients to feel calm and comfortable while dealing with their addiction. The facility includes separate houses, each with its own therapist, as well as outdoor amenities like swimming pools, gazebos, snack cafes, a large dining hall, workout gym and various medical offices. Ducey says that their goal is to make their patients feel at home while helping them to get to the root of their addiction, which is when recovery can begin.

Those who would like more information on the inpatient or outpatient treatment options or about drug rehab Winter Park can visit WhiteSands Treatment Center online. Their website offers a more complete overview of their resort style setting as well as their many locations throughout the state of Florida.
