

# Perfect10Resumes.com Reveal Free CV And Resume Samples In New Guide

*July 02, 2015*

July 02, 2015 - PRESSADVANTAGE -

Perfect10Resumes.com in Elkins Park, PA has recently released a helpful guide to those hunting a job. "CVs That Sizzle & Resumes That Rock" is a rebrand and re-release, free CV and resume samples guide. It offers templates and examples of CVs and resumes customizable for every situation. There's also extra material so jobseekers know what words to avoid on the CV or resume.

Jewel Bracy DeMaio from Perfect10Resumes.com stated: "The sample resumes are up to date and should help the majority of jobseekers find a style and sample text. The ebook is a step above just searching the Internet for a resume and guessing how to put one together."

The original eBook has been around for quite some time, as Regina Stark knows. "I found this so helpful when I first graduated college. It was so intimidating just thinking about building my resume. The book had everything in it that I needed to create a great resume, and land a great job."

The eBook will allow job seekers to create professional resumes in a matter of minutes, with samples and examples to help guide them along. It also includes words that jobseekers should avoid when creating their resumes; words that can stop them from landing a job interview.

"The job market is tough and having a great resume can make all the difference between a good salary and the unemployment line," says DeMaio. "We've compiled a lot of great tips and strategies to help jobseekers really push their resumes to the top of the pile."

Statistics show that for every new job, there are at least 10 people competing. Research also shows that a professionally written resume will get the attention of human resource managers and hiring committees much more than a resume that is drafted using normal word processing software. "We're just looking to give people an edge when it comes to finding and landing that perfect job," says DeMaio.

Jobseekers can gain more information about the eBook, how it can help them to create professional resumes, and what it offers by visiting:
