

## **Local Beauty Expert Highlights The Importance Of Choosing The Best Eyelash Extension Glue**

*December 27, 2018*

December 27, 2018 - PRESSADVANTAGE -

Del Mar, California based Infinit Lash Products has recently issued a public advisory on how to properly choose the best eyelash extension adhesive.

"We always say that the eyes are the windows to our soul, and if you are one of the ladies who wanted to make them even more attractive by using eyelash extensions, it is very important that you know how to properly choose, use, and apply the best adhesive that goes with them," says Tasha Land from Infinit Lash Products.

According to Land, there are several factors to consider when choosing for the best eyelash extension glue or adhesive.

Primarily, it is important to pay attention to the performance of an adhesive in different situations, like in hot and humid conditions. "If you live in a place with high humidity, the glue might dry out quickly. On the other hand, if you live in a dry place, it might take longer to cure. Our advice is to purchase humidifiers and dehumidifiers to achieve the right level of humidity during application. Alternatively, it is important to purchase

the right type of extension glue that will suit the climate of the place you are living in," Land said.

Secondly, for beginners who are just learning how to apply lash extensions, they need an adhesive that is flexible enough for where adjustments are needed. For these reasons, ladies might want to consider an eyelash glue that has a longer drying or curing time. This way, should there be any mistakes, there will be enough time to correct them.

Also, skin and eye sensitivity should also be considered. Generally, dermatologists always advise doing a spot test when trying on a new product to avoid any adverse and allergic reaction. The same rule applies when buying an eyelash adhesive, that is why it is very important to find a brand that also offers a mild and gentle product line.

Lastly, the retention of eyelash extension glue is a deal breaker for many. "The right adhesive, when paired with the right technique and placement will provide a long-lasting effect. Proper maintenance must also be observed to prolong the lifespan of your eyelash extensions," she added.

Infinet Lash Products offers an array of lash adhesive products for all types of situations and requirements. They offer five different types of extension glue, including Sensitive, Sensitive Plus, Classic, Volume and Volume Plus.

The Sensitive adhesive line has a drying time of 5-7 seconds, a retention of 4-5 weeks, low fume strength, a viscosity of 1 out of 5 and is recommended for beginners in eyelash extension application. Meanwhile, the Sensitive Plus has a drying time of 4-5 seconds, a retention of 5-6 weeks, low fume strength, a viscosity of 2 out of 5 and is also recommended for beginners. On the other hand, the Classic line has a drying time of 3-5 seconds, a retention of 5-7 weeks, medium fume strength, a viscosity of 2 out of 5 and is recommended for intermediate and advanced users. In addition, the Volume adhesive line has a drying time of 2-3 seconds, a retention of 5-7 weeks, medium/strong fume strength, a viscosity of 2 out of 5 and is recommended for advanced users. Lastly, the Volume Plus has a drying time of 1-2 seconds, a long retention of 7-8 weeks, strong fume strength, a viscosity of 4 out of 5 and is recommended for only the most advanced and experienced users.

Useful tips for choosing the best eyelash extension curls, guidelines on how to maintain lash extensions, and instructions on how to apply eyelash extension glue, can be found on Infinet Lash Products' website. Interested customers may also visit their online store on Amazon to check out their positive feedback and recommendations.

Leigh Horne, one of their many satisfied customers said, "I have tried at least 7 different lash extension adhesives and Infinet Lash Products are by far are the best. I am an esthetician/lash tech and speed is very

important. I have increased my speed incredibly by using their glue. The search is over. I found the perfect line of lash adhesive.?
