

# Granite Countertops Now Available For Kitchens In Louisville

*December 31, 2018*

December 31, 2018 - PRESSADVANTAGE -

Louisville Cabinets and Countertops, a kitchen design and remodeling company based in Louisville, Kentucky, has announced the availability of granite countertops. The company provides kitchen design and remodeling services for homes in Louisville and neighboring areas. Granite is a favored material for kitchen countertops because it is not only hard and resistant to scratches, but it is also heat resistant, which are characteristics that are desirable in the kitchen.

Tim Montgomery, owner of Louisville Cabinets and Countertops, says, "We're happy to announce that we have a wide range of granite countertops available for kitchens in Louisville and surrounding areas. Our fully trained granite and marble countertops staff will assist you in the whole process from choosing your granite slabs, coordinating template design and installation dates all the way through to the completion of your custom solid surface or granite countertops, tiles or room projects."

Meanwhile, the quality of the services and materials used by Louisville Cabinets and Countertops has been attested to by previous customers. On Google, Kathy C said, "Worked with Tim and his team on a kitchen remodel and couldn't be happier. I will use them again if I ever have another kitchen/bath project."

On Yelp, at <https://www.yelp.com/biz/louisville-cabinets-and-countertops-louisville?osq=Kitchen+Cabinets>, Nina H has given the company five out of five stars. She said, "My overall experience with Louisville Cabinet and Countertops Company was just awesome. The installation process went along very smoothly, the installers were very courteous and friendly. Both Lindsey and Fred were very informative when I was making my choice selections. They were interested and attentive to all of my questions, concerns, and needs. I will indeed recommend this company to my family, and friends if they had the need to purchase new cabinets for their own home. A five star (\*\*\*\*\*) rating is what I give easily. They are overall simply wonderful people to work with."

Aside from granite countertops, Louisville Cabinets and Countertops also offers laminate countertops. These are for homeowners and property owners who want an affordable and easy to care countertop for the kitchen,

which makes it is easy to understand why they are the most popular in the market today. A laminate is composed of a number of layers of synthetic materials, including Kraft paper. It is used for countertops because it is resistant to moisture, abrasions and stains. Furthermore, it is able to maintain its beautiful look without requiring a lot of maintenance.

The company also provides unique cabinets that can help in the renovation of the kitchen, bathroom or any other room. According to Tim, some of the positive characteristics of cabinets provided by Louisville Cabinets & Countertops are the affordable price, expert installation, excellent quality, solid wood construction, more 50 styles to pick from, long last and durable finish, and the use of commercial grade hardware.

The company is so sure of the quality of its cabinets and countertops that it is offering a 100 percent satisfaction guarantee. This means that they will keep coming back until the customer has signified that he is fully satisfied with the work done.

For those who prefer custom cabinetry, these are manufactured using state-of-the-art equipment at the company's facility. Tim says that through the use of advanced finishing equipment, the cabinets are provided with a finish that will maintain its look throughout the lifespan of the home.

Louisville Cabinets & Countertops is a family owned and operated company that offers the installation of various kinds of kitchen cabinets and countertops. They have been providing quality custom granite, onyx, travertine, and marble countertops to home owners, businesses and custom home builders in the Louisville, area for 25 years. They are offering more than 50 styles of semi-custom cabinets that are completely made of wood; fully customized cabinets that are made in their facility; laminate countertops using all major brands of laminate; and production of solid and granite surface countertops.
