Red Stretch Marks Cream Sale Ends at Midnight Tonight Announces Bella Joi

June 28, 2015

June 28, 2015 - PRESSADVANTAGE -

Bella Joi, an online beauty product retailer, announced today that the Red Stretch Marks Cream Sale currently going on at Amazon will end today at midnight. The sale provides a discount on cream that helps remove and repair skin damaged due to pregnancy or rapid weight gain.

"When pregnant women first see the effects of pregnancy weight gain on their skin in the form of stretch marks the first question they usually ask is how to get rid of red stretch marks," says Bella Joi Beauty representative, Holly Richards. "It is important that people treat their red and purple stretch marks when they first appear. If the marks are allowed to turn white they become permanent scars which can only be faded but not removed without the benefit of surgery. The sale is our way of helping those affected by this condition but like all good things it must come to an end at some point and after tonight those wishing for a product to help treat their pregnancy marks with Bella Joi will have to pay full price."

When it comes to stretch marks remedies, the most common options include laser, skin peeling and stretch marks cream. Out of the three, creams are usually a popular option because it is hassle-free and affordable.

Bella Joi's Stretch Mark Cream helps provide nourishment that is critical at the time when skin damage first appears and while the marks are still in the new, red stage. Moisturizing during the six to twelve week period while the marks are red or purple and fresh provides a defense against the marks becoming permanent scars on the skin.

Again, the sale for Bella Joi Stretch Mark Cream ends tonight at midnight. The cream for stretch marks is available at the company's official website, as well as at Amazon.com.
