

Redlands Tree Service Announces Expansion into the Temecula, CA Area

January 07, 2019

January 07, 2019 - PRESSADVANTAGE -

A well-established Redlands tree services provider now has plans to offer their wide variety of tree services in the Temecula, CA area.

The tree services company calls itself Redlands Valley Tree Service LLC. The tree services provider has been around now for several years. They are based out of 1620 New Jersey St. in Redlands, California but over the years the company has expanded into several nearby areas such as Loma Linda, Riverside and Moreno Valley. By offering their many different tree services to homeowners and businesses in the Temecula area, it will expand their service area further south than ever before.

Donna Thompson, a spokesperson for the company, provided an explanation as to why they felt the need to expand their service territory; she said, "We have always made sure we are experts when it comes to doing any type of tree services. Our company also prides itself on going the extra mile for our customers and offering our tree services for very reasonable prices. Apparently the word has spread to those in Temecula about the professional way we go about doing our various tree services. With the large amount of phone inquiries we have been getting from that area, we have decided that there was a mutual benefit to offering

our many different tree services to those in Temecula.?

They have said they will offer their entire tree service package to those home and business owners that are interested in their services in the Temecula, California area. That includes such critical tree service tasks as tree removal, stump grinding and land clearing.

Donna explained how tree removal can be beneficial to healthy tree growth and how it benefits a home or business owner in other ways too; she said, "Our tree removal service is done to get rid of dead and dying trees that have the potential to come down and do extensive damage in a strong storms. Healthy trees whose growth poses a threat to foundations and buildings also need to be taken down. Overcrowding of trees in a yard sometimes necessitates tree removal at times too. Tree removal is something that needs to be done safely and that's the reason why it should only be done by experienced tree professionals like those leading our crews.?"

Although tree removal is one of their specialty tree services, their stump grinding and land clearing services can be very useful too. Donna talked about how their stump grinding and land clearing services can be helpful to home and business owners; she said, "After a tree has been removed, the area where it was still can't be used because of the stump left behind. Stump grinding completely removes all traces of the leftover stump so the area where a tree once stood becomes totally usable again. Land clearing involves taking down all of the trees and removing all of the underbrush in an area a home or business owner now wishes to use for another purpose; this can be done for such reasons as to make room for a new addition or to provide enough open space for a swimming pool or tennis court.

Donna said that one of the important tree services that they will be focusing on in Temecula is tree trimming. She went on to explain the reason for this; she stated, "One of the most neglected areas of tree maintenance for most properties has to do with tree trimming. That's a shame because tree trimming provides a customer's overall landscape with so many benefits. It helps trees look better by maintaining their normal shape, allows air and rain to penetrate deeply into trees for healthy growth and it also allows beneficial sunlight to reach the inner parts of a tree and the other plants found below it.?"

Redlands Valley Tree Service LLC also claims that they are a company that specializes in the somewhat difficult task of palm tree trimming too.

For more information on this expanding tree services provider, one can call Donna Thompson at (909) 328-1542 or go to the company website at <https://redlandstreeservice.business.site/>.
