

Tree Service Company Introduces New Service Area In Malibu CA

January 04, 2019

January 04, 2019 - PRESSADVANTAGE -

Valley Tree Pros LLC, based in Woodland Hills, CA, has revealed that they have started a new service area in Malibu and neighboring areas as of January 1, 2019. Malibu is only 20 miles away from Woodland Hills and is therefore a logical next step in the expansion efforts of the tree services provider. With such a move, the company expects to be better able to serve the needs of property owners in Malibu and surrounding areas.

Valley Tree Pros LLC spokesperson Cheryl Murphy says, "Our arborists can ensure holistic tree services bearing in mind the impact on the immediate surroundings, safety of people and the health of the trees. It is desirable to have as many trees around your house and in the neighborhood as possible. Trees are natural purifiers. They cleanse the air, enrich it with oxygen and also add to the greenery in the area. Despite the many reasons to have adequate trees in a neighborhood, there are times when a few have to be removed, most trees will require timely trimming and diseased or dead trees should be taken care of immediately. Our services are now available not just in Woodland Hills but also in Malibu."

Just like people, trees are vulnerable to disease and they can die if they are not able to get sufficient water

and nutrition. Adult trees usually don't require watering because their roots can get water from the soil or from the groundwater. However, many diseases can substantially affect even mature trees. It is to be expected that it would be the young trees that will get damaged by storms, strong winds, snow, and rain. Nevertheless, even mature trees can have their branches broken or even burned by lightning. Any dead tree in a yard has to be removed as soon as possible, which is what the tree service company can provide.

Valley Tree Pros LLC offers emergency services for those cases when property owners suddenly finding a dead or dying tree in their yard. The company offers speedy tree removal service in Woodland Hills, and now in Malibu. They have the expertise, resources and experience to perform fast tree removal without causing any inconvenience to the property owners. The tree service firm will ensure that the yard, lawn, driveway and even the roads in the neighborhood will not be inconvenienced while performing the process of tree removal. The process has been designed in such a way that it will not compromise the safety of people, including passersby. With their experience and knowledge, they are able to make sure that there will be no damage to any property or injury to people, or that it will affect the beauty of the property.

For some property owners, what is needed is just stump removal because the fallen tree had simply been moved, loaded and hauled away. In this case, what is merely needed is to get rid of the stump that has been left behind. Nevertheless, this will still require some special considerations. For instance, the removal of the stump should be done in such a way that it does not negatively affect the topsoil surrounding the base of the trunk. It may also be a case where the whole stump has to be completely uprooted. Other stumps can be cut off from the base, allowing the underground roots to remain untouched. It should be noted that only professional arborists would know what option to choose. Thus, it would be advisable to consult with Valley Tree Pros LLC, Murphy says.

Valley Tree Pros LLC performs holistic tree services such as tree trimming, tree and branch removal, emergency tree removal, stump grinding, and lot clearing. Their service areas include Woodland Hills and surrounding area, and now also Malibu and its neighboring cities.

Those who need to get more information about their services or would like a free estimate can go to their website or call them by phone. Their business hours from Monday to Saturday are from 7:00 am to 5:00 pm.
