

Tree Service Provider Announces New Service Area In Yorba Linda CA

January 04, 2019

January 04, 2019 -

Valley Tree Service LLC, which is based in Riverside, CA, has announced that they have a new service area in Yorba Linda, starting January 1, 2019. Expansion to Yorba Linda was a logical step for the business located in Riverside because the distance between the two cities is only 29 miles. The expansion is part of the company's continuing commitment towards serving as many people as possible with regards to their tree problems.

Maryn Smith, spokesperson for the tree services company, says, "There are many reasons why you would want to remove a tree from your property. Trees are a natural part of your surroundings and they add beauty to your landscape, but they can also add a multitude of issues. Trees will help keep your home private as well as provide shade but you also have to spend the time to take care of them. If you don't take care of a tree it can pose serious issues to you and your loved ones. This is why it's important to talk to a quality tree removal service if you feel that your trees are going to present you with a problem. Previously, only property owners in Riverside and surrounding areas could access our tree service. As of January 1, people in Yorba Linda and its neighboring areas can now also get help from us. Don't hesitate to call us."

Homeowners and other property owners, particularly those who have trees in their yard, may have already realized that trees need to be taken care of regularly. Their branches need to be trimmed or pruned regularly or else these branches may grow too long so as to touch power lines or even parts of the house, posing the risk of these branches hitting the electric wires or parts of the house, possibly causing damage to property or even injury to people.

Meanwhile, dead trees in the yard attract pests and insects and this could be a health risk for people living in the property. Also, they can further weaken the tree and its branches, increasing the chances of the tree falling down or branches breaking and falling on somebody or part of the property or even a car.

With regards to pests, Maryn Smith says, "If you have a large pest infestation your water or even your food may become contaminated. If you have a fallen or a dead tree in your yard this is also a safety hazard as someone may injure themselves on the tree. If the tree is dead and still standing there's a greater risk that it might fall over it during a storm. If the tree is infested with pests these pests can quickly spread to other areas of your home."

However, Maryn Smith hastens to add that homeowners should not attempt to do the work themselves. While the trimming or pruning of branches or the removal of a tree may seem like simple tasks, they are not really that simple. Climbing a tree, in itself, is already a dangerous task. On the other hand, tree services professionals have the necessary equipment to reach those branches to trim them. They are also knowledgeable and experienced on how to do the task safely. Furthermore, professionals from Valley Tree Service LLC always clean up the area from debris resulting from the tree removal or trimming and get rid of them so that homeowners would not need to worry about cleaning the area afterwards.

Valley Tree Service LLC has a team of professional arborists who can perform tree services such as tree trimming, emergency tree removal, stump grinding, tree and branch removal, and lot clearing. Their services areas include Riverside and surrounding cities, and now also Yorba Linda and its neighboring areas. Those who would like to know more about their services or would like to get a free estimate can visit their website or contact them by phone. Their business hours are from 7:00 am to 5:00 pm, Monday to Saturday.
