

Tree Service Provider Adds New Service Area In Elk Grove CA

January 04, 2019

January 04, 2019 - PRESSADVANTAGE -

Central Valley Tree Service LLC, a tree services provider in Stockton, CA, has announced their addition of a new service in Elk Grove and neighboring areas starting in January 1, 2019. Elk Grove is 37 miles away from Stockton but the company truly wants to expand its service areas to allow more people to take advantage of their services.

Louise Jenkins, spokesperson for tree services provider, says, "We're happy to announce the addition of a new service area for Elk Grove and neighboring cities. We are calling on property owners who want some trees removed or trimmed in their property. It is a fact of life that there are times when we run into problems with trees and when this occurs you may need tree removal or some other tree care service. Whenever you have a problem with a tree you can count on our company to help you. Dead trees on your property can pose a serious risk to both you and your family and they can also put your vehicle and your house at risk of damage."

Trees are a natural part of the environment and they provide property owners with a lot of health benefits because they absorb carbon dioxide and release oxygen into the air. They also provide shade and privacy, while beautifying the property. However, a dead tree or a tree that is dying can pose some risks for both people and property. Trees are vulnerable to diseases, insects and pests. Pests and insects love to establish their homes in dead trees. This is why people need a high quality tree service, which the company seeks to provide in Stockton, and now in Elk Grove and neighboring areas.

Central Valley Tree Service LLC also provides emergency tree removal services for those times when a storm or hurricane causes some trees to fall and branches to break. They have emergency teams ready for such situations. They will inspect the trees and see which ones need to be removed and which branches need to be trimmed. This is because falling branches or tree trunks can injure people and may cause damage to the house or even to a motor vehicle.

Trimming or pruning of tree branches should be left to the professionals, according to Louise Jenkins. It

would not be a good idea for people who don't have the experience and the knowledge to do the tree removal or trimming. Experience has shown that many of those who have tried doing the tasks themselves had ended up in an accident. Furthermore, there is such a thing as a proper way to trim or prune trees. When done incorrectly, trimming or pruning could harm a tree. Also, whenever Central Valley Tree Service performs a service, the team will always remove the resulting debris and then haul them away without any additional charge.

In some cases, properties will have some tree stumps. These can be cut by Central Valley Tree Service and the wood can be used as firewood. The company may also grind the stump down into the ground. Whatever will be done, the company will always eliminate all of the resulting debris and haul them away.

Louise Jenkins says, "Call our service in Stockton or Elk Grove, California and we will be happy to come and look at your trees. We are a licensed and bonded tree trimming service. We can do all sorts of work such as stump removal, tree trimming, and removal of dead trees from your property so that you and your family have peace of mind."

Central Valley Tree Service LLC offers professional tree services with its experienced tree professionals. Its services include tree trimming, tree and branch removal, emergency tree removal, stump grinding, and lot clearing.

Property owners who need more information on the tree services or would like a free estimate can go to their website or contact them through the phone. Their business hours are from 7:00 am to 5:00 pm, Monday to Saturday.
