

Easy Move Removals Adds Home Moving Packing Cases to Their Services

January 07, 2019

January 07, 2019 - PRESSADVANTAGE -

Easy Move Removals from Swansea has added the option to include packing cases in their home moving services.

Packing is a crucial part of any home move and if householders get it wrong the result can be costly. As a result, Easy Move Removals now offers home movers the option to purchase professional packing cases, so they can pack their belongings themselves. Alternatively, their fully trained staff can take care of part or all the packing needs themselves.

Home movers who opt for the Easy Move Removals full packing service will benefit from a team of packers who come to the home prior to the move and they will pack all belongings and prepare all items ahead of the move. Staff have access to quality packing materials and are trained, experienced professionals. Having Easy Move staff carry out the packing also gives home movers superior insurance cover.

Explains Wayne Florance, MD from Easy Move Removals, explains why the company has introduced this new home moving service: "Our extensive experience shows that home movers prefer to have a professional

packing service offered by their home removal company to ensure the safety carriage of their possessions. This additional service also takes away an additional headache for the home owners who have other issues to deal with when it comes to moving home.?

Antique or highly polished furniture in particular requires specialist wrapping for extra protection. Pictures or extra delicate items like glasses and mirrors may also require crating. Easy Move?s experienced packers will ensure these items are packed in a stable, safe position during the home move.

Easy Moves? new packaging service also includes a part packing service where their professional packers will pack delicate items and the customer is charged per box packed which is an ideal option for those watching their home move budget. For those who prefer to pack their possessions themselves, Easy Move Removals will provide a free loan of packing cases and tape with other packing items such as bubble wrap available to purchase from the company.

?We always prefer to do the packing ourselves,? continues Wayne, ?as we can guarantee safe transit and it also helps to reduce insurance costs. But we do understand why some home movers prefer to pack their own possessions, so an addition to our services include a guide on how to pack in order to protect the goods to minimise breakages during the move.?

Easy Move Removals? home moving packing case service is available for home moves of all sizes, including their Man and a Van service, as well as for commercial office moves.
