July 07, 2015 - PRESSADVANTAGE -

Steven Jackson, owner and CEO of Nonpareil Comics LLC, recently announced that his new e-book graphic novel, "Seav Ivory: Crosses Insignias & Dollar Signs," is in the process of being published. The hard copy version will be available to the general public after approval checks have been made and are considered satisfactory.

The graphic novel has been available for purchase on Amazon as an eComic since last year. The success of the novel led the company to decide to print a physical comic book for its rapidly growing fan base.

After several years of developing the storyline and choreographing the artwork for Seav Ivory, Jackson finalized the end draft and released it to the public. Since then it has garnered the interest of many readers who have now become the novel's advocates. The artwork was done by renowned illustrator Pablo Arias, who illustrated several other graphic novel projects leading up to this.

Apart from this latest creation, Steven Jackson also has a number of other graphic novel projects, including

Infinity, which is also available on Amazon. Both releases have received favorable critiques despite being in different genres. One notable commonality is that both books feature a female protagonist, rare in the world of graphic novels.

According to Jackson, fans of Nonpareil can expect to see a number of exciting releases in the near future. Apart from the hard copy version of Seav Ivory, progress is being made toward the production of a live movie adaptation. Several actors and actresses have already been selected to play key roles and auditions for other characters are currently taking place.
