### **ABC Contracting Offers Mold Removal St Louis**

*January 18, 2019*

January 18, 2019 - PRESSADVANTAGE -

ABC Contracting, a St. Louis-based company, is proud to offer its mold removal services to customers in the St. Louis area and surrounding communities. The contractor specializes in construction and environmental services including mold remediation, residential remodeling, and asbestos removal. Their office, located at 2039 Oberhelman Road in Foristell, MO, is eager to help customers with their mold removal needs.

The company's expertise includes environmental services such as mold removal for commercial and residential customers. PRNewswire.com is a major press release service that reaches media outlets such as The New York Times and more than 4,500 U.S. websites. They report that the U.S. Indoor Air Quality market is expected to grow to \$11.4 billion by 2019 and the environmental services segment, which includes mold remediation, is expected to grow to \$3.0 billion in 2019. Tina Benton, spokesperson for ABC, says, "ABC's national resources and employee base provides its customers with all of the requirements to handle construction and environmental needs from large scale property loss to residential mold/asbestos abatement." Customers can learn more by calling (314) 582-3611.

For a homeowner or business, a proper mold inspection can assure that they do not pay for costly repairs later on. But, unfortunately, many people wait until the mold has spread before seeking help. When it comes to Mold Removal St Louis, it's always best in terms of time and money to hire a professional mold

remediation company. ABC is a certified mold specialist that can deal with any hazardous materials that are present in projects like the removal of mold.

Usually when a homeowner or business discovers a water leakage mold is sure to follow. Insurance companies and the local code inspector will insist on having a certified mold removal expert. ABC can isolate the part of the home or business that has mold. They inspect and seal off every area where mold resides. They use the proper equipment to contain the mold spores and remove the mold. During the remediation process, they use plastic sheets and tape to cover doorways, vents, and such prior to removal. They replace the drywall, carpet, and flooring that may have mold. They do air quality testing to prevent the mold from returning.

Mold can go from a small outbreak to a large infestation in a short amount of time. The two factors that aid in mold growth are moisture exposure and humidity. Mold growth is inevitable when there is standing water or structural pieces of a home that are constantly soaked or submerged with water. Mold can grow on almost any structure in the rooms of a home, including the walls, windows and frames, ceilings, and especially on building materials in the basement such as wood and drywall. Mold can grow in the bathroom so it's important to get rid of it. Drying and dehumidifying the mold area is the first step. Then a professional should be called in to make sure the problem is fixed.

Mold removal is so important no matter where it is found. The dangers of removing mold without the proper equipment can create health risks such as irritating respiratory issues. When there is mold growing, but the homeowner or business doesn't notice discoloration of the walls or anyone getting sick, a common mistake is to ignore the mold. This is dangerous because mold does not go away by itself and it can degrade building materials and reduce the property value of the structure.

The Google reviews reinforce what Tina Benton says. Mark Coleman said, "My basement flooded and the project manager Will came out and was very helpful. Would highly recommend ABC Contracting for home remodeling or asbestos removal. We have to give the whole crew at ABC a big Kudos." Alex Barton said, "ABC contracting always goes the extra mile!"

Customers can find out more about the company's mold removal and other services by going to their website at [abcenviroclean.com](http://abcenviroclean.com). They can also call the company's Foristell, MO office.
