Tree Service Company In Palo Alto Announces Expansion To Neighboring Areas

January 16, 2019

January 16, 2019 - PRESSADVANTAGE -

Palo Alto Tree Leaders, a tree service firm in Palo Alto, CA, has announced that they are expanding to neighboring communities. They point out that their tree trimming service is essential because poorly trimmed or pruned trees can result in serious problems. They have professionals in their teams who are knowledgeable on the proper way to trim or prune trees, and also how to take care of trees.

Rose Nash, spokesperson for Palo Alto Tree Leaders, says, "We are so happy to announce that we are expanding our services to the neighboring communities of Palo Alto, California. This means that we would be able to serve more homeowners and property owners with regards to their tree needs."

Rose Nash adds, "Trees can boost your property value. Trees add beauty and can help boost your property value by thousands of dollars especially if you are planning to sell it in the future. Palo Alto Tree Leaders can help make this come true for you - call us today to have your Palo Alto, California trees taken care of."

The company has posted several articles on Google that describe the services they provide. These posts can be accessed through <https://goo.gl/posts/4PWQheECmrm>. One of their key services is tree removal. This is

because dead and dying trees need to be removed or they will affect the other trees in the yard. These trees are likely to have been affected by bacteria, viruses or parasites and these can be transferred to the other trees if the trees are not removed as soon as possible. Furthermore, dead trees tend to attract pests, such as mice and rats who love making their nests in these trees. The problem is that when these pests go searching for food, they will likely find their way into the home.

Meanwhile, Palo Alto Tree Leaders warns homeowners that while tree removal may seem to be an easy task, it is actually a dangerous one. Statistics have shown a large number of accidents involving people trying to cut down trees but don't have the necessary knowledge, experience and equipment.

As discussed above, the tree trimming service from Palo Alto Tree Leaders is vital because amateurs trimming or pruning trees can cause serious issues if they are not knowledgeable on the proper way to do it.

And then there is the emergency tree service, which is what is needed after a storm. Strong winds can uproot trees or cause them to fall down or their branches to break. After storm, a lot of broken branches litter the yard. Palo Alto Tree Leaders can help in clearing these properly and safely. If there are any fallen trees, they have the knowledge experience and equipment to cut tree trunks and haul them away so that the yard will look beautiful again.

The stump removal or grinding service will be needed by homeowners who for some one reason or another find unsightly tree stumps in their yard. Getting rid of these tree stumps can be very difficult and dangerous for those who don't have the necessary equipment and knowledge.

Palo Alto Tree Leaders offers tree removal, tree trimming, emergency tree service, and stump removal and grinding. Their business hours are from 8:00 am to 6:00 pm, Mondays to Saturdays. Tree trimming is needed not just to have healthier trees but also because there may come a time when tree branches have grown too long that they are almost touching electric lines along the street or they are already hitting the side of the house whenever there is a strong wind.

Rose Nash concludes, "There's no doubt that most people use trees to form beautiful landscapes to improve properties. But you can not just plant them and walk away. You should give your trees a look over or inspection regularly. This will provide you with an opportunity to understand if there are any looming issues, disease, or dangers. If needed, call us for an inspection."

Those who need more information or want to visit their office can view their business map that shows the Palo Alto Tree Leaders service location and more.
