For Those Searching For Pest Control Near Me Apex Pest Control Offers Solutions

January 17, 2019

January 17, 2019 -
A pest control company in Sheffield South Yorkshire, United Kingdom has announced that they offer quality pest control for clients in Sheffield and surrounding areas. The company states that those who are searching for ?pest control near me? can contact them for service for a number of bugs, bees and other rodents.

Tony Johnson, a representative for the pest control company, says, ?Our years of experience make us one of the premier pest control services in our area. We are always happy to answer any questions that our clients have before providing them with service. Simply contact us for assistance with any number of pests, and we will take care of it with our friendly and reliable service.?

Johnson states that the company offers a comprehensive pest control service. They currently treat homes and businesses for rats and mice, as well as ants, fleas, wasps and bees, bedbugs, cockroaches and more. He states that they have more than 30 years of experience and hire only the most professional and experienced technicians to service their customers.

The pest control company is fully insured and a member of N.P.T.A, the United Kingdom?s National Pest

Technicians Association, which is a trade association for those in the pest control industry. The association provides a platform and resources that are designed to assist pest control technicians in safely undertaking their responsibilities.

?All of the technicians at our Sheffield pest control company are certified and thoroughly trained to do their jobs effectively while keeping homes and businesses safe,? says Johnson. ?We all take our jobs very seriously and will always help our clients by explaining the infestation or situation to them and helping them to understand better how it happened, what needs to be done to eliminate it and how they can help to keep infestations from happening again in the future.?

Johnson states that the company has been providing quality pest control in Sheffield and surrounding areas for decades and that they know and utilise all of the latest in products and technology to keep clients and their families safe while providing the best in pest elimination. He says that they go over and above the typical ant and cockroach treatments, offering control for outdoor pests such as rabbits and foxes, as well as uncommon indoor pests such as bats and even bed bugs.

Bed bugs, according to a number of global news sources, have become a major issue in the United Kingdom, as well as in the United States and various other locations. Johnson states that short of moving from the home and leaving everything behind, consumers are not likely to be able to rid themselves of bed bugs. He states that these issues need a professional touch and says that the company has a number of treatment methods that have proven to be effective against bed bugs. He states that they offer treatment for virtually any pest that a home or business could experience and states that those who need pest control should contact the company immediately to schedule a consultation. Johnson states that during the initial consultation, an inspection will be done to determine the level of infestation and the reason behind it. From there, he states that they fully inform clients of what needs to be done, the cost of the service and anything else that the client needs to know about ridding their home or business of bugs or other pests.

Apex Pest Control has been a customer favourite in the Sheffield area for many years. Johnson states that it is the company?s dedication to complete customer service and satisfaction, as well as their experience and knowledge of the pest control industry that has allowed them to maintain this positive reputation over the years. Those interested can visit the company online or on social media to read through reviews that have been left by past clients or to schedule an initial consultation.
