

Dermatologist In Newport Beach Announces New Services

January 19, 2019

January 19, 2019 - PRESSADVANTAGE -

Dr. Stefani Kappel, a prominent dermatologist in Newport Beach, has announced a new range of services for those who are determined to age gracefully. Dr. Kappel offers a wide range of anti-aging procedures, including Botox, dermal fillers and body contouring.

Dr. Kappel is board certified in dermatology and is a fellowship trained surgeon. She states that she offers a number of specialties to help men and women to feel better in their skin.

“Many patients simply do not understand these procedures, which is why they never opt to receive them,” says Dr. Kappel. “Those who have had injectable neuromodulators such as Botox or Juvaderm and other dermal fillers know how wonderful they feel when the procedure is done and how beautiful it can make their skin.”

Dr. Kappel states that she also provides body contouring using lasers and energy devices to help remove or reduce fine lines and wrinkles, brown spots, and cellulite and to reduce fat. She states that anyone who is interested in learning more about how these procedures can benefit them can simply contact her office and

schedule an initial consultation.

Stefani Kappel MD earned her medical degree from the University of California in Irvine and did her residency at UCLA in dermatology. She joined UCLA after her residency as a clinical instructor and professor in the fields of dermatology and dermatologic surgeries. Since earning her official medical doctor licensing, she has gone on to complete an advanced fellowship in dermatologic surgery at the University of California in Davis and studied under Dr. Suzanne Kilmer, a world-renowned dermatologic surgeon in the field of laser and skin surgery.

Dr. Kappel served as Director of Dermatologic Surgery at the Northern California Laser and Skin Surgery Center and has remained active in clinical trials and remained up to date on the latest in technical advances in the field of dermatology and aesthetics.

"It's all about continuing to learn," says Dr. Kappel. "Our office offers a number of procedures and there are new things being tested every day; new procedures that can offer a wealth of benefits to those who are looking to change some aspect of their appearance. We are passionate about helping people and spend as much time as possible learning all of these new procedures and how they can help our patients."

One of the procedures that Dr. Kappel offers is Botox. Botox has gained in popularity over the years and is an effective treatment against crow's feet, fine lines and wrinkles. Botox injections are safe and in most cases, patients can resume their normal activities on the same day as their procedure is done. Dr. Kappel states that she offers Botox for those who are looking for a way to keep age at bay, and states that she can offer a consultation with information about the procedure, its benefits and any downtime that patients may expect after the procedure is done.

Dr. Kappel states that there are a number of things, aside from aging, that can cause fine lines and wrinkles. She states that it is important for the patient to consult with a dermatologist to learn about these factors and to learn about the best way of eliminating them. She states that she is pleased to offer a number of anti-aging and other dermatology services to the Newport Beach area and that she looks forward to helping patients to look and feel better with the treatment that is right for them.

Those who are interested in learning more about Dr. Kappel's credentials or the wide range of services that she offers can visit her on her official website at <http://stefanikappelmd.com/>. Dr. Kappel states that she looks forward to consultations with her new patients and states that anyone who has questions about any of the procedures offered in her practice can contact the office to learn more. She states that her website also hosts a blog where interested consumers can learn more about the procedures that she offers.
