

Dr. Amauri Caversan Publishes New Post On Benefits Of Working With A Naturopathic Medicine Practitioner

January 21, 2019

January 21, 2019 -

Dr. Amauri Wellness Centre in Toronto, Ontario has announced the publication of a new blog post. The wellness center recently announced that they have published a new post that outlines the benefits of working with a naturopathic medicine practitioner.

Dr. Amauri Caversan says, "A health professional that focuses on naturopathic medicine can help clients to understand a number of lifestyle changes that could potentially give them a higher quality of life. For instance, the keto diet is a popular lifestyle change today. Those who are looking to lose weight and get fit may have questions about the keto diet, what it is and how it can help. Our center can answer these questions and others related to naturopathic medicine."

Dr. Amauri states that the center's new blog post covers information about the keto diet, as well as other questions that clients commonly have. The post covers the flu and gives information on how long it typically lasts and the risks for contracting it. Other topics covered in the post include working with a naturopathic

medicine professional and how it can help in a number of ways.

“Many people are confused by what a naturopath in Toronto does,” says Dr. Amauri. “Our goal with this latest blog post is to answer a few questions that people have about our profession and the types of naturopathic care modalities that we can offer and how they can help them to live healthier lives.”

Dr. Amauri says that the new blog post is currently available for those who are interested to read. It can be accessed through the wellness center’s official website, along with a wide range of other blog posts that are all designed to shed some light on naturopathic medicine and how it can benefit those who use it.

He says that clients should understand that a compromised immune system can make them susceptible to a number of illnesses. Naturopathic doctors can help by offering nutritional IV therapies for instance that include high doses of Vitamin C. This vitamin is essential in helping to ward off certain illnesses such as the common cold and the flu. Dr. Amauri says that with this therapy, clients can fight off these illnesses more effectively.

Dr. Amauri states that the blog post helps clients to better understand what they do in their wellness center. Naturopathy is used in a number of treatment plans for things such as chronic fatigue, pain, and digestive disorders, to mention a few.

Naturopathy involves understanding the patient on several levels and helping to determine why they are having a particular issue or why that issue is not responding to other treatments. Practitioners that specialize in naturopathy listen intently to patients and their complaints and work out an individualized plan to help treat those issues. Dr. Amauri says that the center’s new blog post outlines things such as fatigue and what could be potentially causing these issues, offering an explanation for the issue as well as a potential list of naturopathic care modalities options.

Dr. Amauri states that he and his entire team are dedicated to the overall wellness of their clients. He says that anyone who has questions about naturopathy or the services that are available for certain issues can visit the site and read through their various blog posts that are currently available. Those with continued questions about naturopathy or the benefits of working with a naturopath can visit Dr. Amauri Caversan Naturopath on his official website or contact the center directly through the site, by email or by telephone to schedule an initial consultation.
