

Plumber Now Offers Services In Sturgeon Falls

January 22, 2019

January 22, 2019 - PRESSADVANTAGE -

A popular plumbing company has announced that they are now offering services in Sturgeon Falls, Ontario. Those who are searching for a Sturgeon Falls plumber near me can now visit the plumbing company online or contact them directly to schedule a service.

Dave Fortier, a representative for the company says, "We are pleased to now be offering our expansive list of services to home and business owners in the Sturgeon Falls region. We always recommend that consumers contact only a licensed and certified plumbing company for their plumbing needs, and we are proud to state that we are fully licensed for all of the services that we provide."

The company has received a number of five-star reviews for the services that they offer. They recently completed an expansion of their service area, and that expansion was met with even more stellar reviews and recommendations from their customers. Those who are interested can read through a variety of reviews on the company's official website. Fortier states that they always do everything in their power to ensure that their customers are completely satisfied and that they call on the company again if and when they ever require plumbing services.

A recent release by the company highlighted their Sturgeon Falls Plumbing Services Expansion Completed with 5 Star Review. One reviewer states that she needed someone to do minor services in her home, and she states that the workers arrived right on time and delivered their promised services at a fair price.

"Plumbing issues can involve anything from a simple clogged pipe in the kitchen sink to a toilet that won't flush," says Fortier. "There are so many issues that can cause problems with the water delivery or sewers in a home or business. Our team is experienced and trained to handle these issues and to ensure that each customer is pleased at the end of our visit."

Fortier says that sewers can often get backed up when there is a lot of moisture on the ground. Traditional septic tanks can become full, which will stop toilets from flushing and sinks from draining. This can be caused by long periods of rain or heavy snow. Fortier states that any home or business owner who has noticed a

slow-moving drain or toilets that are not flushing properly should contact the company for an inspection. Drains that are not working properly could signal an even more serious problem and a backed up sewer causes not only unappealing smells in the structure but could back up enough to cause damage to the home or business.

Fortier states that the company is now proudly offering their services to those in Sturgeon Falls and states that the company website offers more information about each of their services that they provide. Those who are interested in contacting the plumbing company can also do so on their official website or call them directly to schedule an inspection or a service.

The company has been providing services around the Sturgeon Falls area for many years. They recently stated that they have the team of professionals available now to offer more service to more customers, and so they opted to expand their service reach to include those in this new area. North Plumbing & Mechanical is a licensed plumbing company. Fortier states that they are insured and a certified Red Seal plumbing company that offers a wide range of commercial and residential services to those in North Bay, Ontario and now in Sturgeon Falls. Other service areas include those around North Bay such as Callander, Crystal Falls and others. Those who are interested in seeing their entire list of service areas can do so on their official company website. Fortier states that any home or business owner who needs plumbing services can contact the company directly to schedule an appointment or visit them online to learn more about their credentials, experience or the services they offer.
