

Daly City Tree Leaders

Daly City Company Announces Tree Service Expansion

January 24, 2019

January 24, 2019 - PRESSADVANTAGE -

Daly City Tree Leaders in Daly City, California has announced that they are expanding their tree service to include neighboring communities. The company states that they will now offer services outside of Daly City. Services include tree removals, pruning and trimming.

Emma Duncan, a representative for the company says, "We are thrilled to be offering our services to those who live outside of Daly City. Our reputation for hard work and professional tree servicing has led to this expansion, and we truly thank our loyal customers for making the way for us to grow."

Duncan says that trees are an important part of the environment and that having them on a home or business property offers a number of benefits. She states that while trees can provide an aesthetic benefit, this only applies to trees that are properly cared for; pruned when needed. Trees that are unhealthy can cause serious issues on the property. Unpruned limbs and branches can break, falling to the ground and potentially harming anything or anyone in their path. Duncan states that it is imperative that property owners have their trees serviced to ensure that they are in good condition.

"Property owners could be held responsible if a branch were to fall and harm someone or even go through their car," says Duncan. "As a property owner, it is imperative that one ensures that there are no issues that

could end in trees damaging the property of someone else.?

More on the services provided by the tree company can be seen at <https://goo.gl/maps/eqzGQxhTtvC2>. Duncan says that utilizing the services provided by professional and experienced arborists is essential in keeping properties safe and trees healthy. Tree removal, she says, should always only be done by those who are thoroughly trained in the task, particularly for larger trees. Removing a tree on one's own could cause serious damage and injury. Dead trees often do need to be removed but Duncan says that anyone who does not have the training of an arborist may not know the safest way to remove the tree. Safety must be considered both for the property and people around the tree that is being removed, as well as for any other trees that may be near.

Duncan states that the company only employs experienced and trained professionals who know the safest and best possible way to remove trees and to trim or prune them to make them healthier. She states that they can also provide stump removal for home and business owners who need to remove the remains of an old tree but do not want to damage their property in doing so.

In addition to removing dead or dying trees, the company also provides services that are designed to help keep trees healthy. Duncan states that regular pruning, particularly for certain types of trees, is essential in keeping them looking their best. Regularly having trees serviced could keep them from rotting and dying and needing to be removed in the future.

The company states that those who would like more information on any of the services that they offer, in addition to news about them that has recently been released, can visit them online at <https://www.pressadvantage.com/organization/daly-city-tree-leaders1>. Duncan states that they work with home and business owners for properties of all sizes and offer services that are essential for keeping trees healthy and thriving. The company is located in Daly City, California and states that they offer services throughout the city, as well as in outlying areas. Duncan says that they are pleased to be offering this new service area location and look forward to potentially expanding even further in the future.

Those who are interested in learning more about the tree company and the specific services that they offer can visit them on their official website. Those interested in scheduling an appointment to have a tree removed, trimmed or otherwise serviced can contact the company directly.
