

99 Plus CBD Excited To Get Athletic With Next Level Ninja Games

January 26, 2019

January 26, 2019 - PRESSADVANTAGE -

Las Vegas, NV based 99Plus CBD is delighted to announce that they are launching a partnership/sponsorship with Next Level Ninja Games. "We believe that Next Level Ninja Games will be one of the most exciting competitions to involve both competitors and watchers alike, and we are extremely glad we can help make that happen," said Adam Ster of 99Plus CBD.

Ster went on to say that, "We don't want to give too much away beforehand, but the interactive user-to-athlete platform is a real game-changer," speaking about a mechanic in the competition that allows audience members to select an athlete's decisions. More details about Next Level Ninja Games' competition, and other media can be found at their Facebook page: <https://www.facebook.com/nextlevelninjagames/>.

"Both 99Plus CBD and Next Level Ninja Games have mutual goals and objectives to help everyone looking to raise their game in personal fitness, health, and in their lives," said Ster. Cannabidiol (CBD) is one of over 100 compounds called cannabinoids that are found in cannabis plants. Unlike the mind-altering compound Tetrahydrocannabinol (THC), CBD is non-psychoactive, meaning it will not produce the perception-warping effects the former is known for.

Early on in 2018, CBD was eliminated from a list of banned substances compiled by the World Anti-Doping Agency. US Anti-Doping agencies soon followed suit. The psychoactive element of THC is still banned as compared to synthetic cannabinoids. Since CBD does not cause psychoactive effects, it is an excellent option for people seeking the benefits of cannabis products without "getting high" or breaking federal law. Medical studies suggest that CBD may be beneficial if used as natural medicine for treating a multitude of health conditions, such as anxiety, stress, epilepsy, PTSD, depression. It also possesses anti-inflammatory properties.

Jake Murray, a competitor, had this insight to share: "I was having shoulder pain the day of a ninja warrior competition and I took a 50mg 99Plus CBD capsule a few hours before. I started to feel the pain go away and

was actually able to perform to my highest standards. Thanks, guys!?

99Plus CBD is proud to offer athletes and the average consumer a natural alternative to Over-The-Counter (OTC) medications. Applications for 99Plus CBD include pain relief, reduce anxiety and game-day stress, quicker recovery, boosting immune systems, and more. For those training for a Next Level Ninja Games event, CBD can complement their training and fitness program. More details concerning 99Plus CBD, and other materials, can be found at their Facebook page: <https://www.facebook.com/99pluscbd/>.

OTC painkillers are known for their ability to mask most types of pain in their entirety. However, they may also have the unwanted side-effect of reducing cognitive function, and even render a false sense of ability when they diminish the sensitivity of feedback from injuries. CBD, comparatively, is a much better method to address pain without impacting cognitive ability.

"We produce some of the best CBD products for exercise junkies and athletes," said Ster. He explained that using CBD as an add-on to any exercise program enables those looking to improve their fitness to recover faster, cope with pain, and even fight disease more efficiently. CBD Isolate is considered the most healthy and potent of all the varieties available.

"The Next Level Ninja Games provides a great opportunity for us to show how everyone looking to improve their health and fitness can benefit from our CBD products. We also can't wait to see the exciting moments the new interactive user-to-athlete platform will bring to the sporting event," said Ster.

Those looking for more information may contact Adam Ster, 99Plus CBD, Las Vegas, NV. Contact details and other information may also be found on their website and social media channels.
