

Burlingame Tree Leaders

Burlingame Tree Leaders Announces Tree Service Expansion

January 28, 2019

January 28, 2019 - PRESSADVANTAGE -

Burlingame Tree Leaders in Burlingame, California has announced that they are expanding their tree service in Burlingame and surrounding Bay areas. The company recently announced that they have added staff and a fleet of vehicles, along with new professional equipment so that they are now able to offer their services to the communities that lie outside of Burlingame.

Anna Knox, a representative for the company says, "We are pleased to be expanding our service area in an effort to help even more home and business owners to keep their trees healthy and their properties beautiful."

Knox says that the company is offering this service area expansion just in time to help property owners to prepare for the upcoming rainy season in California. December through March typically brings the most rain to California. The tree service company states that it is never too late to have trees inspected and evaluated to see what services they may need. Knox states that they offer free no obligation estimates for all of their services. More on the new areas that the company is now servicing can be seen at <https://goo.gl/maps/HBWMHBEhNhA2>.

?Pruning trees is crucial in keeping them from posing risks,? says Knox. ?Dead or dying branches could fall and harm people or property under them. Aside from that, property owners want their properties to always give them the best possible value. A dead or dying tree could actually lower the value of a property.?

Knox states that the company provides emergency services as well, and says that those emergency services will also be available to home and business owners in their new service areas. Emergency services are those that are needed after the company?s normal business hours, typically in the middle of the night, on weekends or on holidays. Knox says that they provide emergency services to remove tree branches that may be precariously close to falling or to remove trees and branches from homes, vehicles and power lines.

The company states that all of the services that they originally offered to their customers in Burlingame will be available to those who are located outside of Burlingame. More on this can be seen online at their tree service website. Knox states that they are pleased to be offering the services of certified and experienced arborists for those living in the neighboring communities of their original location.

She states that many home and business owners often try to remove trees themselves but warns that this is never a good idea. She says that it often takes specialized equipment to safely and effectively remove trees or branches and that the average consumer does not have access to this equipment. Knox says that their company has the cutting equipment as well as bucket trucks and other needed equipment to effectively remove branches or entire trees while keeping the property underneath perfectly safe.

The company offers general information on their website about trees and how property owners can help to keep them healthy. Knox says that they always recommend that property owners know more about their trees, including the benefits that trees offer and how often they should be maintained. She states that any home or business owner outside of Burlingame can contact them to learn more about their new service areas or to schedule a consultation or an onsite estimate. The company has been providing tree services in Burlingame for quite some time and state that they are pleased to finally be branching out with their service offerings.

Those who need to schedule an appointment can do so through the company?s official website or by contacting them directly by phone or email. Knox says that they offer only professional and high quality tree trimming and other arborist services and employ only those who have proven to fit in with their high standards. She says that those who would like more information should visit them on their website to see their entire list of services and service areas and to read more about proper tree care on their company blog.
