ABC Contracting Services Frozen Pipes In St. Louis

January 31, 2019

January 31, 2019 - PRESSADVANTAGE -

Foristell, Missouri based contracting company, ABC Contracting, is proud to deliver their frozen pipe repair services to residents in the St Louis and surrounding areas. Specializing in construction and environmental contracting services, the company has been proudly serving the local community for many years.

ABC Contracting's construction and maintenance services are available for both residential and commercial clients. These include frozen pipe repair, mold remediation, residential remodeling, and asbestos removal. St Louis is known for its extreme weather conditions during winter, with temperatures plunging well below 0°C during the nights. In such situations, any water still in the pipes can freeze over, causing them to expand and crack. If the issue is not addressed, the water pipes can burst, causing damage to residential or commercial properties.

ABC Contracting employs certified professionals that provide repairing services for frozen pipes St Louis. They offer a wide range of plumbing services, including frozen and even burst pipe repair. As stated on the company's website, "Frozen pipes are a common emergency that can give you the illusion that you may not need to act fast. "However, this is far from the truth. Pipe bursts can happen suddenly, even when the appropriate maintenance was done. If your home or business has recently experienced frozen or burst pipes, call ABC Contracting immediately. Our fast response team will start restoring your property and get rid of all

traces of water damage. Our mitigation technicians have some of the best tools in the industry, and can make quick work of water restoration projects. One call to ABC Contracting can save you both time and money. When you choose to hire ABC, you will be well on your way to a solution to any of your restoration needs.?

Burst pipes can create a mess and be very hard to fix. ABC Contracting has experts that handle burst pipe repair St Louis. ?Unfortunately, even when maintenance and upkeep is done to minimize the chances of a burst pipe, it can still happen,? said Tina Benton, a spokesperson for ABC Contracting. Once a pipe is burst, remedial actions need to be taken immediately before the resulting water damage spreads and causes even more problems, such as mold. Prevention is always better than a cure, so the earlier the issue is dealt with, the better. The last thing any property owner wants is to have one burst pipe leading to wide patches of mold infesting their living or working area.

Due in part to their prompt response when customers call on them in times of crisis, ABC Contracting has won the trust of the many satisfied customers in the local community. ?I am thoroughly impressed with this company. We hired them to fix some water damage after one of the water supply pipes burst in our house in St. Louis, and they did a fantastic job. They kept everything very clean and were very knowledgeable. Not only did they remove the mold from the water damage, they also used insulation and other techniques to help keep our pipes from bursting in the future,? said Amy J.

ABC Contracting is also one of the top firms to take care of water damage St Louis. Water damage following pipe bursts can cause a series of problems, which can then compromise the structural integrity of a property. Insurance companies often insist on having certified mold removal experts for repairs. ABC Contracting takes care of these problems by isolating areas with water damage and mold, and sealing them off after inspection. They utilise the proper equipment to contain mold spores and remove mold. Plastic sheets and tape are used to cover doorways, vents, and other crevices during the remediation process. They even replace carpets, drywall, and flooring in order to make sure the water damage is contained and mold does not spread.

ABC Contracting services extend to certain unforeseeable circumstance as well, including repairs from fire damage and emergency services in cases of flood damage, emergency demolition, black water/sewage spill, and other disaster-related damages. Interested parties can find out more about the company's services by going to their website at <https://abcenviroclean.com/>, or call the company's Foristell, MO office.
