

## **Aantex Pest Control Norcal Offering Control For Bed Bugs In The Greater Sacramento Area**

*February 02, 2019*

February 02, 2019 - PRESSADVANTAGE -

Sacramento, California based Aantex Pest Control Norcal celebrated its 48th anniversary last November, having proudly provided bed bug extermination services during their professional endeavors in Sacramento and its surrounding areas. The company has a proven track record of delivering high quality and thorough extermination services that have been appraised by the local community.

Over the many years Aantex Pest Control Norcal has been in operation, the company has built a history of providing superior bed bugs control and pest management for homes, offices, and businesses. They have a "get it right the first time" attitude when it comes to any form of infestation, and their dedication to great customer service has resulted in a high rate of customer retention over the years. They have successfully managed to leverage their good relationships with customers to keep business flourishing, despite economic downturns.

"Our continuing objective is and always will be, to provide exceptional customer service both in and out of our office," said co-owner and founder Jim Wood. "Customer satisfaction will continue to be the number one priority, even before the growth of our company."

The many areas and cities that the company operates in include Sacramento, Rocklin, Roseville, Granite Bay, Carmichael, Loomis, Folsom, Fair Oaks, Orangevale, Citrus Heights, South Sacramento, Elk Grove, and Laguna. Among their many extermination services are bed bugs pest control management, rodent control, and more. Aantex Pest Control Norcal can take care of any form of infestation there might be, whether within residential homes or office/commercial buildings.

Bed bugs control is among the specialties of the company, especially since bed bugs are highly adaptable. An adult bed bug can survive for many months, even a year, without food, which makes them very difficult to kill. Once a place is infested, they reproduce very quickly and can hide in the unlikeliest of places, making extermination a very difficult job. Bed bug bites can cause itching and inflammation, followed by a great deal of discomfort.

For the sake of the health of family or pets, it is important to get rid of bed bugs as soon as they're spotted. Note that even "minor" sightings must be taken seriously, as even a single bug can lay eggs and build up a colony, emphasizing the need for extermination services that get the job done. Professional experts need to be hired in order to destroy the infestation thoroughly. The services of just such a company, Aantex Pest Control Norcal, can be availed by calling them and scheduling an inspection.

As noted on the company's website, "Once we've been scheduled, one of our skilled technicians will give your residence or commercial building a thorough bed bug inspection to confirm you do indeed have a bed bug problem, versus another kind of pest problem. Once we confirm a bed bug infestation, we will customize an expert bed bug treatment for you that eliminates bed bugs and their eggs where they live, hide and breed in your home or business, working as quickly and effectively as possible to eradicate them with minimum interruption to your life or business."

Aantex Pest Control Norcal has an extensive list of satisfied customers, and they enjoy exceptional ratings on online review platforms. "We have been having flea problems for many years now," said Tom H. on Yelp. "The other day I called Aantex to solve this year's attack. After the visit, everyone in the home had a nice night's sleep, and I know the residual substances will finish the rest of them off. Finally, our flea problem is under control, and we have Aantex to thank for it. We are looking forward to the rest of the year's service!"

Aantex Pest Control Norcal provides the most effective bed bug treatment, at a highly competitive price, in Northern Sacramento. Those willing to avail the company's services for any kind of bug, pest, or rodent infestation can visit the company's website for more details or call them for a session. They offer free estimates for any extermination job.
