

Specialised Tank Services Named Pioneer Water Tanks? Victorian State Dealer of the Year at Annual Awards Night

February 01, 2019

February 01, 2019 - PRESSADVANTAGE -

Further cementing a successful and long running partnership between Pioneer Water Tanks and Specialised Tank Services, dating back almost 27 years to 1992; at a recent awards night, Ballarat based water tank dealer, Specialised Tank Services, took out the award for Pioneer's Victorian State Dealer of the Year, providing further proof that Specialised Tank Services continue to provide great service, installing the water tanks Melbourne deserves, no matter their water harvesting requirements.

At the recent awards night hosted by Pioneer Water Tanks in Alice Springs, which was attended by dealers from all across Australia, Specialised Tank Services took out the State award for best dealer, to add to their list of accolades - which includes taking home the National Master Dealer of the Year Award at the Perth awards night in 2017.

Specialised Tank Services formed in 1992, when licenced plumber Richard Holloway recognised a need for a quality solution to water storage and water tank repairs in the Ballarat region. Over time, and through their partnership with Pioneer Water Tanks, they were able to extend these services to the Bendigo, Geelong, Surf

Coast, Otways, Hamilton, Grampians, Warrnambool and Melbourne regions. Specialised Tank Service's goal is to be the complete package when providing quality solutions to water storage needs, and they also offer the earthmoving side of the installation process, meaning they not only install the water tank, but are able to prepare the site beforehand.

Jacob, from Ballan, Victoria, is the owner of three Pioneer Water Tanks that have all been installed and serviced by Specialised Tanks Services. "I've purchased three Pioneer Water Tanks from Specialised Tank Services over the past few years. I've got one 60,000L tank that is for stock water. I run a solar powered pump off a large dam and then gravity feed seven stock troughs. There's and 80,000L tank connected to our shed and an off-grid power system, and a new 130,000L tank connected to our house," he says.

Jacob stated that not only was the service he received excellent, and provided by skilled and friendly installers, but that Specialised Tank Services also promptly followed up with some extras that he requested. "I think I need another (water tank) in a few months for stock water from another dam. So, it might be Pioneer Water Tank number four for me soon!"

Specialised Tank Services aren't just in the business of highly professional rainwater tank installation. They also provide repairs and service for Victorian water tanks throughout their lifetime, repairing water tank roofing, installing liners, and providing expert cleaning services - including high resolution ROV (remotely operated vehicle) tank inspections.

Specialised Tank Services exclusively installs Pioneer Water Tanks, in a long running commitment to provide high quality steel water tanks to Victorians, using Australian made and sourced BlueScope Steel. Specialised Tank Services offers solutions for both rural and commercial water harvesting needs, with Pioneer Water Tanks ranging from the smaller 10kL tank up to the very large 3ML tank.

This partnership has endured thanks to Specialised Tank Services' expert and professional service, paired with the high strength and quality water tanks that Pioneer supplies. All Pioneer Water Tanks installed by Specialised Tank Services features Pioneers' exclusive 8-80 V LOCK ® tank wall profile, designed for optimal strength, made from Australian Steel, and the industry leading AQUALINER FRESH® antimicrobial tank liner ensuring that your water stays fresher for longer.

For those who are looking for a water tank in southern Victoria, it's hard to look past the partnership of Specialised Tank Services and Pioneer Water Tanks for professionalism, quality and ongoing service for the water tank, no matter the water harvesting needs.
