## Local Tree Service Company Expands Operations In Santa Clara

*February 04, 2019*

February 04, 2019 - PRESSADVANTAGE -

Santa Clara, CA based Santa Clara Tree Leaders, a tree and arborist services company, is pleased to bring their services to Santa Clara and the surrounding areas. The company offers tree cutting, trimming, upkeep, and inspections for residential and commercial properties in the Bay Area.

The upkeep and management of trees is vital to maintaining the landscape of a neighborhood. In order to maintain an aesthetic appeal, regular upkeep needs to be done. Furthermore, diseased or dying trees need to be maintained in a timely manner in order to preserve them. However, dead, weak, or fallen trees need to be removed as they pose a hazard to nearby residents, properties, and other trees. The risk increases manifold during strong winds and hurricanes, which can uproot trees and lead to significant risk of damage to property and human life alike in such circumstances.

“Seasonal changes can wear down some trees, and they may gradually succumb without the residents or regular passersby even knowing,” said Trent Cauz from Santa Clara Tree Leaders. “Commercial and industrial property owners often conduct periodic reviews to assess the health of the trees on their premises. Civic authorities also sanction such assessments from time to time. It is necessary to know if some trees are

at risk of falling, and hence they should be proactively removed.?

The company provides free estimates for their tree removal services. Trees that are dead, weak, or are beyond any remedy need to be taken down immediately to prevent any ensuing issues. Such jobs are dangerous, and require the services of professionals for the best and most efficient results. Tree removals are usually scheduled with the company, but they can be called upon for an immediate response in the event of an emergency. Sometimes, sudden and extreme weather conditions create emergency situations that make it impossible for tree removals to be scheduled beforehand. Santa Clara Tree Leaders gladly responds to any tree-related emergency on an ad-hoc basis.

With their main office located in Santa Clara, the company's services are available Monday through Saturday. You can see more at their Santa Clara tree services map. The firm hires qualified and experienced professionals who are familiar with the various tree species native to the area and their maintenance.

Beyond tree removal, the company does a thorough trimming and pruning job for the beautification, safety, and long life of a tree. A team of expert landscapers and tree professionals assess the needs of each tree in an area, and suggest trimming, pruning, or cutting at the right time. If not trimmed at the right time or at the right places, trees may grow erratically and become an unappealing sight.

Our tree trimming service can have beautification as the ultimate objective, states the company on their website. It may also be tweaked to focus only on safety. Tree pruning is an essential process. It is required to ensure trees do not grow erratically and subsequently pose any risk to the immediate surroundings, which include your property and the people in the area. Our tree pruning and tree trimming can attend to both safety and beautification. The exercise can also prioritize the health of the trees. Many trees grow well when they are trimmed or pruned at the right time.?

Santa Clara Tree leaders will also get rid of any tree stumps left over in a property. While not as dangerous as cutting down an entire tree, removing stumps can still be somewhat dangerous, difficult, and time consuming, especially without the right equipment. Santa Clara Tree leaders employs an arsenal comprised of advanced tools and the latest technology to cut trees right down to their base.

Those interesting in beautifying their environment, or having trees within their properties trimmed or removed, can contact Trent Cauz of Santa Clara Tree Leaders. They may also reach the company by visiting their website or calling them directly. More details can be found at <https://goo.gl/posts/zUr2p43fnyL2>. The company has also recently increased their social media presence, and can be found on their Facebook page.
