

EcoElectronix Comments on How They Are Helping The Environment and Leading as an Example for Other Companies

February 15, 2019

February 15, 2019 - PRESSADVANTAGE -

Global warming and the environmental impact humans have had on earth is becoming more known and talked about. Ninety-seven percent of climate scientists agree that climate-warming trends over the past century are very likely due to human activities, and most of the leading scientific organizations worldwide have issued public statements endorsing this position. In an effort to make a difference and help the environment, some companies are taking a stand and changing the way they manufacture products.

A company called EcoElectronix donates a portion of their sales to responsibly run environmental charities, including Friends of the Earth, Rainforest Alliance, and Earthjustice. In addition to donating money, EcoElectronix has creates high-quality office supplies with sustainable manufacturing practices as stated by Seth Allen, family owner of EcoElectronix.

“Our purpose is to produce top quality electronic products using responsible and sustainable manufacturing practices,” says a representative. “Many of today's electronics, unfortunately, are produced without the future of our earth in mind. We are changing that by raising the standards and improving the methods by

which our electronic products are made. Even though using sustainable materials, can be more expensive, it is a necessity. We have had nothing but positive feedback from customers who are happy to support a company that cares about the environment, and we sincerely hope that other companies see the change we are making and look for ways they can help too.?

One of EcoElectronix wrote a review on Amazon.com stating how they were very impressed with the EX-20 electric pencil sharpener and the impact a purchase has on the environment. ?I first bought their stapler, and then the pencil sharpener. I really don't see why I should ever buy products like theirs from any place else- these items come with a Lifetime Replacement Warranty, which upon receiving your purchase, you can go online and easily register. How great for the environment, and I am super impressed! Go on their website and read about the products. You can keep these two items plugged in or add some batteries and take someplace else if needed, they have both options. Seriously impressed!?

By looking at the bans of plastic bags and straws in some parts of the world, it is clear that one person making changes can lead to a domino effect that can lead to massive changes worldwide. To learn more about EcoElectronix and the products they manufacture, readers can visit their website. Readers are encouraged to reach out to the company about any questions they may have regarding products or how they can help the environment too.
