
Laser Hair Removal Clinic Expands Into Grapevine TX

February 19, 2019

February 19, 2019 - PRESSADVANTAGE -

Clear Image Laser Studio recently announced that it is expanding its laser hair removal services to Grapevine, Texas. "At Clear Image, we believe that Laser hair removal should be affordable without compromising safety, service, or results. For this reason, we always provide competitive pricing, with all treatments performed by our expertly trained staff, using the highest quality equipment available, to ensure the best results possible," said Imtiaz Khanji of Clear Image Laser Studio. More information can be found here: https://www.clearimagehair.com/laser-hair-removal-grapevine/.

Clear Image Laser Studio is a premier cosmetic clinic specializing exclusively in laser hair removal for all body areas. Laser hair removal is a unique beauty treatment because it can be done on just about any part of the body. They are dedicated to keeping treatments and technicians up to date with the very latest in laser hair removal technology. Clear Image has been performing laser hair treatments for over 18 years, making it one of the most experienced clinics in Texas.

In Grapevine, Clear Image uses only trained and licensed professionals with top industry-recognized certifications?including the receptionists. Technicians are supervised by an in-house physician, further adding to the expert care provided to all clients.

Clear Image exclusively uses Candela laser systems, the most advanced lasers in the industry. These systems use the Alexandrite laser, which has completely revolutionized the laser hair removal industry. Thanks to this new technology, laser hair removal now has a sterling reputation for being pain-free, safe, fast, and permanent.

Many people are familiar with the more ?common? areas that get treated for laser hair removal and are delighted to have the opportunity to consider other potential treatment areas, as well as consider different options for treatment even before they visit a laser hair removal facility. Clear Image is happy to discuss these, as well as treat the more common areas like the arms, legs, and underarms.

Laser hair removal is now one of most common cosmetic procedures for both women and men. Many people are tired of the almost daily routine of shaving, tweezing, using painful epilators or wax to get the perfect hair free profile they seek.

The laser hair removal offered by Clear Image ensures that its customers get permanent hair reduction, and also never have to deal with ingrown hairs. As the veteran cosmetic clinic notes, ?We all know that looking your best can boost your confidence, and using laser hair removal means never being caught off guard by forgetting to shave or wax. Being ready to enjoy the sunshine, looking ?beach ready,? or even just getting dressed up for that special night out can mean the world to a person, especially if they don?t have to to make a last minute painful wax appointment.?

Laser hair removal helps ensure permanent hair reduction, unlike waxing or shaving. At Clear Image, the goal is not just to temporarily get rid of the hair, but to halt hair growth once and for all by destroying the germ cells in the hair follicle that produce it in the first place.

When shaving, plucking, or waxing many people get ingrown hairs. This happens when the tip of the hair grows sideways into the skin instead of up and out of the follicle. Clogged pores and even naturally curly hair can increase the probability of this happening after shaving or waxing. Worst of all, ingrown hairs can be painful, irritating, and can cause bumpy skin or cysts. Since laser treatments target and destroy the hair follicles from which hair grows, ingrown hairs are eliminated as well.

As most people are short of time, they can look forward to saving over 70 days that would have otherwise been spent on shaving and upkeep (averaged out over 40 years). Even better, they could also save around $5,000-$7,000 USD on razors, shaving creams, and after-shaving lotions. Laser hair removal not only saves money and time, it also reduces exposure to the nasty chemicals that may be found in shaving and waxing products.

Clear Image is excited to serve Grapevine Texas with their laser hair removal services. They provide useful

information for their enthusiastic followers via their social media channels on Facebook and Twitter. Those looking to get in touch with the cosmetic clinic may contact Clear Image Laser Studio. Further contact information can be found on their website at https://www.clearimagehair.com.
