

## **MathFileFolderGames Is Providing Teachers Summer Ideas With Their Latest Measurement Games**

*July 18, 2015*

July 18, 2015 - PRESSADVANTAGE -

MathFileFolderGames.com, a Canadian based educational tools company, has released their latest measurement games to the public. This is good news for teachers who are looking for great ideas this summer when they begin planning their lessons. The company believes that integrating fun measurement games for kids into the learning process can create a more interactive and interesting experience for young students who have questions about math and how they can be applied to real life. The company explains, "This great package of measurement games will get your students asking those same kinds of real world questions. And the games give them fun and creative ways to answer them. Of course they are simple to play and adaptable to any age group (they recommend these measurement activities for 2nd through 8th grade)."

To help educational professionals begin this summer prep work, MathFileFolderGames.com offers their Measurement Games, which can be purchased through [teacherspayteachers.com](http://teacherspayteachers.com). The activities set include 28 unique and cool games which help students focus on how to appropriately measure items, and which units should be utilized. Subjects such as the height of the Eiffel Tower, measuring in meters, and creating paper chains of certain lengths are all included.

Aside from offering teachers the ability to prepare their curriculum before the end of summer break, MathFileFolderGames.com also believes that their measurement math games can make a difference for parents at home. The summer months are described by the company as a wonderful time for those who struggle with math to catch up before heading into a new year with a fresh mind. This extra help can make a big difference to the grades and self-esteem of somebody who has been having problems in junior levels of mathematics. They can be applied in summer camps and home play groups as well.

MathFileFolderGames.com invites teachers and parents to visit their site for more information on their measurement games and other activities packs which are designed to help students strengthen their math skills. The company has proven themselves passionate about helping children reach their potentials in every subject, and supply a large selection of aids for teachers and other educational leaders to incorporate into their classrooms.
