

Customer Finds Wrist Relief in EX-25 Electric Stapler After Trying Numerous Other Brands

February 25, 2019

February 25, 2019 - PRESSADVANTAGE -

Electric staplers are a popular choice among those who staple lots in their day to day life. The reason why so many people make the switch from manual to electric is to help take some of the pressure off of hands and wrists that come from manual staplers. Unfortunately, some stapler brands that advertise low effort still require high levels of labor that can lead to sore hands and wrists.

An Amazon customer learned the hard way that some stapler brands are not honest in their advertising, after having to purchase three different staplers from different brands in hopes that one would not cause strain on the wrist. Luckily, the search is over after the customer came across the EX-25 by EcoElectronix and was so pleased that they wrote a review on Amazon.com.

The customer stated, "I was using a regular Swingline electric stapler for a long time, but it was heavy and high effort, so my wrist was beginning to hurt while using it. I first bought a different stapler from Amazon that was touted as "low effort" that you could supposedly staple with your finger, but I found it to be annoying and while it required less effort than the Swingline, the stapler was wider and I found it uncomfortable to hold and use."

The customer added, "I tried the EX-25 automatic stapler and I'm so glad I did! It's a bit heavier than the Swingline (which is heavy) but the weight is a complete non-issue because it's certainly not heavy enough to hold. I don't put my paper into the stapler when it's stationary in a desk, I lift it up and insert the paper into the stapler. Since I don't have to press the stapler closed, there's no strain on my wrist. I installed the 6 batteries so that there are no cables cluttering things. I like that you can adjust the depth of the paper to dictate the location of the staple. I absolutely love this stapler."

EcoElectronix is an honest brand that stands behind their products 100%, as stated by Seth Allen, a family owner of EcoElectronix. "We at EcoElectronix know that our customers are purchasing the EX-25 electric stapler in hopes that it provides an easy and low effort stapling experience, and this is what we aim to provide. Unlike other brands that are not honest about their products labor requirements, we are 100% honest in the low effort needed to operate our electric staplers."

The electric stapler features many Amazon.com reviews from people of all ages and professions. The reviews outline the benefits the stapler has offered in the workplace, personal life, and to family and friends, as well as reviews stating the outstanding customer service.

To purchase the EX-25 electric stapler, readers can visit Amazon.com where it is available in both black and white for \$39.73. For inquiries regarding the stapler and company, viewers can contact EcoElectronix directly through their website.
