

# Security Experts Expand To Offer Home Security Systems In Tujunga, CA

*March 04, 2019*

March 04, 2019 - PRESSADVANTAGE -

Tujunga, California based Tujunga Home Protection Pros is pleased to announce the expansion of their home security services in and around the Tujunga area. The company provides consultation and installation of alarms and other home security systems in the area.

"Tujunga Home Protection Pros isn't scaring you when our experts give you home burglary statistics," notes the company. "In fact, the U.S. Bureau of Justice releases reports related to residential and commercial property burglaries every year. One scary figure you should remember: home theft occurs every 15 seconds. Leaving your home's security to chance shouldn't be part of your action plan. When it comes to securing your home from burglars, prevention is key."

On their website, at <https://tjungahomeprotectionpros.business.site>, the company provides an in-depth look at the security services and products that they offer. Being a security systems supplier, they provide a range security products from simple burglar alarms all the way up to complex security and surveillance systems involving infrared gates, close-circuit cameras, digitally password protected access locks and so on.

Among the services they offer is a free home security review. Residents in and around the Tujunga area can call on them to review existing security system installations and suggest ways to improve the security of their homes. Furthermore, the company also provides security systems utilizing advanced tamper-resistant technology, which includes wireless motion sensors and onboard cameras that provide real-time visual feedback and live video monitoring. Quotations for such systems are also provided free of charge with no obligation incurred.

The video monitoring services provided by Tujunga Home Protection Pros include day and night coverage, with full-color resolution, adjustable pan/tilt function, and night-vision technology.

Having security systems at home, even the most basic burglar alarms, can be a strong deterrent for most burglars. The company maintains, "It may seem old school, but home alarm systems can still shoo away

intruders near (or inside) your property. Many policemen believe that these alarms are the reason why 90% of home invasions end up as discouraged robbery attempts.?

Furthermore, the company suggests residential marking in order to keep property and valuables safe. Residential marking is simply marking all your valuables with an identifying signature. When it comes to real estate, marking means placing a signage, window stickers, house number, postcode, and so on. Police even recommend marking high-value items like antiques. The advanced forensic markings today are even only visible under Ultraviolet (UV) light. Tujunga Home Protection Pros explains that, Markings are used so that police could identify stolen goods which, in turn, make it harder for thieves to sell them on the black market.?

The firm's office is located in Tujunga, at <https://goo.gl/maps/Cv3ARPqib9K2>, and is open seven days a week. They operate between 5AM to 10PM during weekdays, and 5AM to 8PM during weekends. Residents in or near the area can call on them for free quotes, security reviews, and more. Their website provides a service coverage area map as well.

Clients who have availed the services of Tujunga Home Protection Pros have great things to say about them. We have had many problems with petty burglars breaking in, especially when we're out of town on business or visiting relatives, says Jason T. We contacted Tujunga Home Protection Pros to have a wireless monitoring system set up that sounds off an alarm when a burglar enters. It has been over two years now that we haven't been burgled, and that is all thanks to the reliable system Tujunga Home Protection Pros has installed for us. It has never failed! We also greatly appreciate their service, as they're always on call when we have any questions, and they carry out regular inspections to check if everything is in order.?

Those interested in protecting their homes with Tujunga Home Protection Pros' security services may contact the company by phone. Details regarding their services can also be found on their website. Furthermore, Tujunga Home Protection Pros maintains an online newsroom, at <https://www.pressadvantage.com/organization/tujunga-home-protection-pros>, where more information regarding the company, along with their latest news and updates can be found.
