

Electric Sharpener Saves Hundreds of Dollars By Automatically Detecting When Pencil is Fully Sharp

February 28, 2019

February 28, 2019 - PRESSADVANTAGE -

For drawing, writing, sketching or working with pencils and pencil crayons it is important to have a sharpener that can fit the user's needs. For different tasks, a pencil often requires a different level of sharpness and EcoElectronix is helping customers achieve this with their high-tech automatic pencil sharpener.

EcoElectronix is an eco-friendly company that took its customers needs into consideration when designing their EX-20 electric pencil sharpener. The sharpener itself is made with high-quality materials and environmentally friendly manufacturing practices. Users can choose the level of sharpness wanted by sliding the lever on the side of the sharpener from sharp to blunt or leaving it somewhere in between for a middle level of sharpness.

One of the most raved about features of the EX-20 is its auto-off indicator that automatically stops the pencil from sharpening once the user's desired sharpness is reached. The auto-off can save users hundreds of dollars from broken lead and ruined pencils that often occurs when using manual pencil sharpeners as stated by an employee for EcoElectronix. ?A lot of our customers are professional artists and writers who rely on our pencil sharpener to sharpen their expensive pencils and pencil crayons. With manual sharpeners, you don?t

know when the pencil is sharp and often they are too aggressive and break the lead causing the pencil to be ruined and wasted.?

The company has received hundreds of 5-star reviews from customers who are really enjoying the features of the EX-20. One customer wrote, ?I really like this pencil sharpener and it is so smooth and makes a great point at the end of the pencil. Another good feature it has is it stops running the pencil sharpener when it has completed the sharpening. Thank you for making such a good product at an affordable price!?

Readers can view more reviews on Amazon.com as well as purchase the pencil sharpener for \$22.73. For any questions regarding the companies products or warranty policy, customers are encouraged to contact support, available 24/7.
