

## **Magnetic Phone Holder Makes Waves By Offering Customers A Special Incentive**

*July 16, 2015*

July 16, 2015 - PRESSADVANTAGE -

Fort Bragg, California based company Blue-Garuda Mobile Accessories, recently announced a promotion on their Magnetic Phone Holder. The holder can be purchased through the company's online sales channel for \$15.99 with a free bonus. Those consumers who are members of Amazon Prime can also count on free shipping of their 50% off product.

Blue-Garuda Mobile Accessories is highly reputed among their customers, with an online ranking that portrays a majority of positive reviews. The company website, which is located at <http://blue-garuda.com> offers a look at these reviews, as does the Blue-Garuda external online sales channel. One such satisfied customer wrote, "Used numerous styles of magnetic mounts, each having some type of glitch. Not so with Blue-Garuda. Everyone I've showed the Blue-Garuda Mount, wants me to order them one. Currently use with iPhone 6 Plus. Drive a lifted Tundra that isn't the smoothest ride. Never have had my phone come loose. Extremely satisfied customer."

Customers who are interested in taking advantage of the new low sale price are directed to purchase the phone holder through the company's retail portal at

<http://www.amazon.com/Mount-Blue-Garuda-Magnetic-Phone-Holder/dp/B00QHD2UIE>. Here, consumers can view photos of the product and learn more about the materials and benefits associated with the holder. Blue-Garuda says, "The Blue-Garuda magnetic car phone holder contains a super magnet enclosed in a high quality rubber casing that keeps your phone securely fixed while driving, allowing you to concentrate on the road ahead. It clips easily to your vehicle's air vent ensuring your phone is within an effortless reach. And allows for easy access to your phone's headphone jack, control buttons and charging port."

The Magnetic Phone Holder differs from other products on the market due to its magnetic cling rather than suction as a holding force. This is said by the company to reduce residue marks on the windshield or dashboard. While suction is no longer used, Blue-Garuda stands by their design, stating that it is strong, durable, and able to be integrated seamlessly with any vehicles dash. With one touch remove, and a rubber design to reduce vibrations during transit it is no surprise that the company backs the device with a no questions asked 30 day money back guarantee. Further details can be found on the companies FaceBook page here <https://www.facebook.com/bluegaruda>.
